VOL. VI. NO. 183.

PRINCE RUPERT, B. C., FRIDAY, AUGUST 6, 1915.

PRICE FIVE CENTS

## RUSSIANS WILL PURSUE WAR TO VICTORY

### BERLIN POPULACE IS JUBILANT--GERMANS WILL FIND WARSAW BARREN CITY

#### MYSTERIOUS SHOOTING AFFRAY IN THE SOUTH

(Special to The Daily News.)

Vancouver, August 6.—Rev. H. P. Nixon, owner of the Twin Islands, who was recently shot while lying reading on his launch, is dead at the General Hospital from wounds. Foul play is suspected. The police state that it may have been the work of a pitlamper, who had mistaken the porthole of the launch for a deer.

Eddy Wood Institute and Ross Barracks, Shorncliffe Camp

Risboro Lines, Shorncliffe Camp

#### REPORT REGARDING THE U. S. DREADNOUGHT FIRE

(Special to The Daily News.)

Philadelphia, August 6.—The committee of inquiry into the fire in the hold of the dreadnought Oklahoma reports that it was due to spontaneous combustion. Repair work is being rushed, but will take from October to January to complete.

Repairs of all description. Quick work at reasonable prices. Phone 583, Fitz. 181-83.

#### RUSSIANS DESTROYING FORTS AND TOWNS AS THEY RETREAT

FACTORIES AND MACHINERY REMOVED FROM WARSAW WILL BE ESTABLISHED IN INTERIOR—GERMANS FIND TOWNS IN FLAMES—ARCHDUKE STEPHAN IS NEW RULER

(Special to The Daily News.)

Petrograd, Aug. 6.—The evacuation of the Ivangorod forts is admitted, as they were unfit to withstand modern warfare. All provisions were methodically removed. The rear guard blew up the concrete casements of the forts and destroyed the bridges which crossed the river.

The government has set aside \$25,000,000 to help pay the costs of the removal of Warsaw mills and factories to the interior of the Empire. All machinery has been removed. The fall of Riga is admitted to be imminent.

The armies are fighting their way back to Russia, with proper striking to prevent the development of the great German enveloping movement. The press is unanimous in declaring that the enforced evacuation of Warsaw will strengthen Russian determination to pursue the war to final victory.

#### Towns in Flames.

The towns of Jiradoff, Groitva, and Bloine were in flames when the Germans arrived. All skilled refugees from the evacuated districts are to help in the manufac-

ture of munitions. Novogeorgovsk is prepared to stand a siege. Ruler of Poland.

Berlin, August 6.—The Kaiser will proclaim the Austrian Archduke Stephan ruler of Poland on his triumphal entry into Warsaw. He will also announce a measure of autonomy for Poland.

The cry of the populace is now "On to Petrograd."

#### FISHERMEN EXPRESS LOYALTY TO THE CAUSE

The master and men of the James Carruthers, numbering twenty men, have contributed \$300 to the Cold Storage machine gun fund. The following letter has been received by Mr. Johnson from the gallant skipper:

S. S. James Carruthers, Ketchikan, Alaska.

Mr. T. H. Johnson, Manager Canadian Fish & Cold Storage Co., Dear Mr. Johnson:—At a spontaneous council of war held on the James Carruthers, while on her way to Ketchikan, the sum of \$300 was contributed for the machine gun which is being presented by the Canadian Fish & Cold Storage Company for the overseas forces.

Please accept same with all good wishes for the fund from the master and crew of the above vessel.

I have not the paper at my disposal to put down the various stock of adjectives that were used at the above meeting, but believe me, were it possible for some of the expletives that were used to reach some of our friends and relatives that are in France fighting our battles, they might have been of a little assistance.

I am sir, Yours very sincerely,  
CHAS. KNIGHTHALL.  
July 31, 1915.

Judge Young has received a letter from Major Peck, dated July 13th, in which he states that he is encouraged to believe that Don. Moore is still alive and in hospital, but unable to write.

Follow the crowd to Self's Cafe. There is a reason. Next Majestic Theatre. 1024f.

Queen's Canadian Military Hospital, Beachborough, Near Folkestone

#### UNUSUAL VIEWS OF SHORNCLIFFE

The high lying Shorncliffe camp near the southern coast of Kent, where the Canadians are at present in training. Eddy Wood Institute and the Ross Barracks, where many of the men are quartered, lie at the north of the camp and the road seen in the picture runs south to Seabrook and the famous old Cinque port of Hythe. The view Risboro lines, shows the married emm's quarters of the camp, now filled with Canadian bachelors, while the Queen's Canadian Military hospital at Beachborough, two and a half miles away is the Elizabethan mansion, which the Canadians and Anglo-Canadian residents of London presented to the War Office at the outbreak of the war.

#### ANOTHER DISTURBANCE BREAKS OUT IN HAYTI

(Special to The Daily News.)

Washington, August 6.—A new revolutionary disturbance has broken out at Gonaves, in Western Hayti. Auxiliary forces and additional naval craft have been dispatched.

#### CASTINEAU COMPANY TAKES OVER BIG MISSOURI

The Big Missouri mineral claim in the Stewart district has changed hands, an option having been taken by the Castineau Mining Co., in which Mr. Jacklin, one of the best known mining men on the coast, is interested. The Castineau Company is one of the strongest on the continent.

The Big Missouri is situated fifteen miles from tidewater, on the south side of the Salmon River glacier. It has been held by Dan Lindeburg for nine years, and has been bonded several times already. It is a large, low grade copper proposition and will require a large amount of capital to make it a producer, the transportation difficulties being the chief obstacle. However, the Castineau Company has the capital and the experience and is almost certain to make a success of the proposition.

#### COL. CARNEGIE WIRES REGARDING ZINC PROPERTY

F. S. Wright, commissioner of the Board of Trade, has received a wire from Colonel Carnegie asking for a report on the zinc properties in this district, in connection with the establishment of a smelter plant on the coast.

#### ANOTHER HAZELTON MINE SHIPPING ORE

The Sunrise mine on Nine Mile mountain near Hazelton has made its first shipment of ore. The consignment, which is of about thirty tons, is being sent to Trail, via Prince Rupert, for treatment.

The ore is rich in silver, and, if this trial shipment turns out satisfactorily in spite of the long haul, the work at the mine will be kept up all winter. The Sunrise is owned by several of the contractors who worked on the G. T. P. construction.

#### CHARLES CHAPLIN AT THE MAJESTIC THEATRE

The Majestic management announces a Chaplin comedy for tonight and tomorrow, entitled "In the Park." Needless to say this piece is one thousand feet of laughter. In addition there will be a very fine three-act Lubin photoplay entitled "Regenerating Love," featuring Ormi Hawley and Earle Metcalfe. This splendid program concludes with a screaming comedy in "When Men Wear Skirts," which is just as funny as the Chaplin feature.

On Monday and Tuesday the second installment of "The Broken Coin" will be shown and no one should miss this extraordinarily thrilling serial.

#### RED CROSS LUNCH

Valhalla Lodge, with the aid of the Scandinavians of Prince Rupert, will serve lunch on Saturday, August 14th, on 6th street, opposite Helgeson's office, in aid of the Red Cross Fund. 181-83.

#### PRINCE RUPERT'S DRYDOCK IS AN ACCOMPLISHED FACT

DRYDOCK COULD BE PUT IN SHAPE TO HANDLE A BIG JOB IN A MATTER OF DAYS—MACHINERY COULD BE ARRANGED TO PRODUCE ABOUT 300 SHELLS EVERY DAY

A representative of the owners of the steamer Delhi was in the city on Wednesday, making enquiries regarding the drydock plant. The Delhi is not a big vessel, but, if she comes here to be repaired, the drydock will have made a start on what is certain to be a great career of shipbuilding and repairing.

After over two years of strenuous work, the drydock is an accomplished fact. If a rush job comes along the dock could be put into thorough working order in a few days. Under the direction of D. J. Broderick, the B.C. Equipment Company has just completed the installing of the machinery in the machine, boiler and blacksmith shops, and in the shipyard. The huge lathes, shears, drills, milling machinery, etc., are all of the very latest design, and

#### THRILLING PLAY AT THE WESTHOLME THEATRE

The Westholme presents tonight and tomorrow Belasco's famous play "The Girl of the Golden West," in five reels. The story is one of those thrilling dramas of the days of the California gold rush. Road agents, gamblers, and mining camp characters of every description furnish five reels of excitement, some of the situations being intensely dramatic.

The big feature is followed by a Keystone comedy entitled "Hogan's Mussy Job." This blend of laughter and thrills should draw a large audience.

#### FLOWER SHOW PROMISES TO BE GREAT SUCCESS

The flower show arranged for August 18th promises to be the most successful ever held in the city. The season has been particularly favorable for flower growing and a splendid exhibition is looked for.

The entries in the garden competition will close on Saturday, August 7th, and judging will take place between August 9th and 14th. Diplomas, as last year, will be given for the best exhibits. For particulars apply to the president, M. M. Stephens, or to the secretary, M. H. Howitt.

are laid on solid concrete beds. Wherever possible the machinery is electrically driven, the power house developing 2,600 horsepower.

One great fact which strikes an uninitiated visitor is that the latest labor saving devices have been adopted. For instance, six huge furnaces and a battery of six boilers can be taken care of by one man, and all he has to do is to keep an eye on the water glass. The coal is brought along in a car running on an overhead monorail system, and the furnaces fed automatically with the exact quantity of coal required. When it is remembered that a great many manufacturers have their profits burned up every year through wasteful coaling, the saving in this department can be to a certain extent realized.

Another interesting feature is the use made of sea water from the bay. The water is pumped into immense tanks and used for condensing purposes. The steam used is condensed and the water collected, and when a sufficient quantity of water has been collected at a given point, its weight automatically releases pressure enough to shoot it along to the boilers again. Sea water will also be used in an emergency fire-fighting plant, which consists of two pumps capable of distributing 1,000 gallons each per minute.

The immensity of the whole undertaking is what strikes a visitor most forcibly. The power
