Greater than Panama's Bridge of Water

The Panama Canal is the logical outcome of the trend of modern commerce—it is monumental evidence of the present-day need for shortening distance—for lessening time and for reducing cost of distribution between maker and consumer.

In point of distance, the Panama will bring the Pacific nearer to the Atlantic by 1,000 miles. In point of time, the sea voyage between Halifax and Vancouver will be shortened by 24 days. In point of cost, the canal will very materially lessen the expense of carrying freight between these places. But there is a stronger factor than even the Panama in shortening distances, lessening cost and saving time between manufacturer and user.

It is Advertising—

It is the quickest—
It is the most direct—
And it is the cheapest—
means of communication between the maker and user of goods.

For instance, Advertising enabled a manufacturer in Nova Scotia to carry a demand for his product

from his factory to the Pacific Coast
— in a few days
— at an insignificant cost
compared with slower and more laborious selling methods.

In one week, thousands learned of his product where it would have taken years for the news to get around without advertising.

To the Manufacturers of Canada:

You will be alert to take advantage of the Panama route for the physical transportation of your goods. Have you considered how quickly, how far, and at what small cost the Advertising Trade Route will carry demand for those goods?

If you are doing a local business talk over your advertising problems with the Advertising Department of this newspaper.

If you are doing a provincial or national business it would be well for you to have the counsel and assistance of a good advertising agency. A list of these will be furnished, without cost or obligation, by the Secretary of Canadian Press Association, Room 503, Lumsden Building, Toronto.
