Greater than Panama's Bridge of Water

The Panama Canal is the logical outcome of the trend of
modern commerce—it is monumental evidence of the present-day need for
shortening distance—for lessening time and for reducing cost of distribution
between maker and consumer.

In point of distance, the Panama will bring the Pacific
nearer to the Atlantic by 1,000 miles. In point of time, the sea voyage between
Halifax and Vancouver will be shortened by 24 days. In point of cost, the canal
will very materially lessen the expense of carrying freight between these places.
But there is a stronger factor than even the Panama in shortening distances,
lessening cost and saving time between manufacturer and user.

It is Advertising—

It is the quickest—

It is the most direct—

And it is the cheapest—

means of communication between the maker and user of goods.

For instance, Advertising enabled a manufacturer in Nova
Scotia to carry a demand for his product

from his factory to the Pacific Coast

— in a few days

— at an insignificant cost

compared with slower and more laborious selling methods.

In one week, thousands learned of his product where it would
have taken years for the news to get around without advertising.

To the Manufacturers of Canada:

You will be alert to take advantage of the
Panama route for the physical transporta-
tion of your goods. Have you considered
how quickly, how far, and at what small
cost the Advertising Trade Route will
carry demand for those goods?

If you are doing a local business talk over your
advertising problems with the Advertising Depart-
ment of this newspaper.

If you are doing a provincial or national business
it would be well for you to have the counsel and
assistance of a good advertising agency. A list of
these will be furnished, without cost or obligation, by
the Secretary of Canadian Press Association, Room
503, Lumsden Building, Toronto.
