## GERMAN CROWN PRINCE'S ARMY REPULSED WITH HEAVY LOSS

### ARTILLERY FIGHTING CONTINUES STEADILY—A DESPERATE GERMAN ATTEMPT TO BREAK LINE—THE CROWN PRINCE'S ARMY REPULSED WITH 100,000 LOSSES

(Special to The Daily News.)

Paris, Sept. 11.—There is uninterrupted artillery fighting all along the western line, which is especially severe in the department of the Meuse and on the Lorraine front. The German Crown Prince made a desperate effort yesterday to break through the French line in Argonne with powerful artillery and a large body of troops.

The French were driven from one trench by liquid fire jets, but recaptured it and repulsed the Germans with heavy loss. The German attempt was abandoned. The Crown Prince's army is said to have suffered total losses of 100,000, one corps losing 40,000.

#### German Air Attacks.

Paris, Sept. 11.—An official re-

port says:—"Two German aeroplanes today dropped bombs on Compiegne. They aimed especially at hospitals. There were no victims, however, of the raid, only some unimportant and immaterial damage is reported to have been done."

#### MYSTERY AND FUN AT WESTHOLME THEATRE

At the Westholme tonight, the third episode of "The Road O' Strife" entitled "The Silver Cup", leaves the audience as mystified as ever. "The Van Thornton Diamonds" is a two-reel society drama showing the work of a "swell crook" and his ultimate downfall.

The Pathe Gazette of up-to-date war scenes is particularly good, while "An Embarrassing Predicament" is full of laughable incident and ludicrous situations. "A Safe Adventure" is a comedy of the knockabout variety with a Chaplin touch about it.

Follow the crowd to Self's Cafe. There is a reason. Next Majestic Theatre. 1021L

#### SIR WILLIAM VAN HORN VERY SERIOUSLY ILL

(Special to The Daily News.)

Montreal, Sept. 11.—Sir Wm. Van Horn, former president of the C. P. R., is seriously ill. Sir William recently underwent an operation and his physicians announce that there is small hope of his recovery.

#### MINING ACTIVITY ON NINE MILE MOUNTAIN

During the past season there has been more development going on in the silver-lead section of the district than at any time since mineral was first discovered on Nine Mile mountain over six years ago.

Before the season is over there will have been some ten car loads sent from Nine Mile mountain to Trail smelter, and it is all ore that will run around the hundred dollar mark, gross value.

The first of the week D. McLeod, L. W. Patmore and the editor of the Herald visited all the properties in the Silver Cup and Sunrise basins, at least all that have been under development this season. These included the Silver Cup, the Silver Bell, the Barber Bill, the Sunrise, and Joe Miller's claims. All these groups are connected by trails, built mostly by the owners, and the going is very easy.

The visitors were accompanied by Geo. Clothier and W. S. Harris. They arrived at the Silver Cup soon after noon and were well fed and refreshed before starting up the hill to the tunnels where the boys are taking out ore and shoving ahead the development.

The Silver Cup has been opened up by a series of tunnels, four of which are now in ore, three on the Cup and one on the Duchess claims. The other two are headed for the Cup vein, but are not completed.

Messrs. Geo. and Roy Clothier have a lease on the property and thus far have devoted themselves to the Nos. 2 and 3 tunnels and to surface work. They will spend the rest of the season in prosecuting development, principally in No. 3 tunnel and getting a good bunch of ore in sight for next season. The boys have come to the conclusion that winter work is out of the question without a long tunnel from the timber or a long snow shed. The expense in either case is not yet justified.

Four carloads have been the output and the class of ore has been profitable to handle. They have had several shoots of ore that were exceptionally rich and on Tuesday they ran into another shoot on the Duchess that will complete the last car and increase the smelter returns materially.—Omineca Herald.

#### PRINCE RUPERT THE PORT OF PROGRESS

The September issue of the Canadian Fisherman devotes four pages to an article by F. S. Wright on "Prince Rupert—The Port of Progress." Mr. Wright has dealt chiefly with the development of fishing and kindred industries, and pictures of the cold storage plant are shown. Such articles must aid materially in bringing the facts regarding Prince Rupert before the world in an interesting way. This is one of the ways in which the Publicity Bureau of the Board of Trade justifies its existence.

#### REV. FATHER BELLE, O. M. I. ARRIVED LAST NIGHT
