CANADIAN EXPRESS CO. AND FISH TRAFFIC

(Continued From Page One.)

most valuable medium of transportation for the fresh fish shipments from Prince Rupert to eastern Canada and the United States. Where necessary, special express trains are made up and run on passenger train schedule to Winnipeg, where connection is made with the trains of the Government Transcontinental Ry. for furtherance to eastern Canada with other express companies with which close traffic arrangements have been effected, to reach the large consuming markets of the United States.

The fish is carried in specially constructed refrigerator cars, equipped for service on fast passenger trains. The cars are supplied with tanks at each end, which are filled with sufficient ice

at Prince Rupert to keep the contents in perfect condition to destination.

Mr. Pullen states that the fish dealers in the eastern cities had nothing but praise for the express service, which enabled them to place their fish on the markets in as fresh condition as when shipped, notwithstanding a rail journey across the continent. Mr. Pullen was also pleased to learn from the fishing companies in Prince Rupert that they appreciate the personal service rendered to them by the company's local agent, Mr. A. D. Gillies.

The Housekeeper is Right

Sometimes a housekeeper requires a quick leavening agent, and finds she has no baking powder.

What does she do?

She raises her biscuit by a mixture of cream of tartar and soda, or soda and sour milk. She may not get the proportions quite right, but she knows her food is safe. But does she ever use a mixture of alum and soda? Was there ever a housekeeper who bought alum and soda to make a home made baking powder? Intuitively she feels it would be unsafe.

Then why use baking powder made from alum or the same mixture that the housekeeper would not dare to mix and use in her food?

Alum is alum, whether bought in the drug store or in baking powder.

DR. PRICE'S CREAM BAKING POWDER

is made from pure cream of tartar and contains no alum, lime or phosphate. There is absolute safety in its use.
