

SHARP ATTACK REPULSED

Dangerous Condition Relieved Just In Time By "Fruit-a-tives"

MR. F. J. CAVEEN
632 Gerrard St. East, Toronto.

For two years, I was a victim of *Acute Indigestion and Gas In The Stomach*. It afterwards attacked my Heart, and I had pains all over the body, so I could hardly move around. I tried all kinds of medicines but none of them did me any good. At last, acting on the advice of a friend, I decided to try 'Fruit-a-tives'. I bought the first box last June, and now I am well, after using only three boxes. I recommend 'Fruit-a-tives' to anyone suffering from Indigestion, no matter how acute".

FRED J. CAVEEN.

INTERESTING FACTS ABOUT MACHINE GUNS

Against machine guns the rifle-man is helpless, a military expert remarked recently; and he was right. Actual tests of machine guns have shown them to be superior to picked marksmen. At a test in this country some time ago, forty-two first-class shots were pitted against one Maxim, each side firing one minute at a target representing infantry in line, at a distance which was unknown, but which was actually 1,000 yards. These were the results: forty-two men, 408 rounds, 62 hits; machine gun 228 rounds, 69 hits; although the Maxim spent some time in getting the range.

Machine guns are really rifles with a mechanical feed, which supplies them rapidly with cartridges. In all modern patterns they are automatic in action. The gas produced by the explosion or shock of the recoil opens the breech, ejects the spent cartridge, loads the rifle, closes the breech, and fires the charge. These complicated operations are carried out with extraordinary speed.

To give an example. The Maxim can fire at least 450 rounds a minute, or more than seven shots per second, and if in exceptionally good order and cleverly operated

In the British army at the beginning of the war the number of machine guns was two to each battalion or cavalry regiment. In the German army there was an extraordinary development of the machine gun sections shortly before the war. Indeed, the enemy is stated to have taken the field with 50,000 of these weapons, so that each German battalion must have had ten, if not more, which gave them an enormous advantage above the Allies at the outset.—Ex.

The Housekeeper is Right

Sometimes a housekeeper requires a quick leavening agent, and finds she has no baking powder. What does she do?

She raises her biscuit by a mixture of cream of tartar and soda, or soda and sour milk. She may not get the proportions quite right, but she knows her food is safe. But does she ever use a mixture of alum and soda? Was there ever a housekeeper who bought alum and soda to make a home made baking powder? Intuitively she feels it would be unsafe.

Then why use baking powder made from alum or the same mixture that the housekeeper would not dare to mix and use in her food?

Alum is alum, whether bought in the drug store or in baking powder.

DR. PRICE'S CREAM BAKING POWDER

is made from pure cream of tartar and contains no alum, lime or phosphate. There is absolute safety in its use.
