KING CONSTANTINE

PREMIER VENIZELOS AND CROWN PRINCE GEORGE

QUEEN SOPHIA

Figures in the recent political upheaval in Greece.—King Constantine who caused the resignation of Premier Venizelos by refusing to accept his war policy is a first cousin of the rulers of Britain, Norway, Sweden, and Russia. His consort, Queen Sophie, is a sister of the Kaiser and is blamed for the pro-German tendencies. The Greek Crown has left Athens with staff officers for Saloniki.

to save our life we should have lost it.

#### Chose Ignoble Way.

"President Wilson chose the ignoble part of saying: 'This is no business of mine.'

"The cry of martyred Belgium went up to Heaven, as the iron heel trampled its people into the dust, but not one word even of protest was sent over by the president of the United States. Belgium even sent her men over to lay the matter before President Wilson and his cabinet, but not a word of protest did he utter, except that there was such a thing as being 'too proud to fight.' All the treaties signed at The Hague have been torn into shreds, but Wilson has said nothing, until it struck the great democracy on the pocketbook, and then a howl went up.

"The man who writes the history of this war a hundred years hence will pronounce upon it that the United States, in trying to save her life, lost it. Someone says what could the United States do? If she had swung in on the side of the Allies at the first, her mighty moral prestige would have ended the war before now. You say is she not supplying the Allies with ammunition? Yes, but that is a purely financial proposition. No, the United States cannot afford to follow President Wilson."

## The Royal Standard Test

[5]

Here's where we test the choicest samples of Canada's six million acre wheat crop. We grind them into flour in the little mill you see on the left of the picture. Then comes the supreme test—bread-baking. If the bread is perfect in every way we pronounce the wheat A1 and the flour—ROYAL STANDARD.

## The Housekeeper is Right

Sometimes a housekeeper requires a quick leavening agent, and finds she has no baking powder.

What does she do?

She raises her biscuit by a mixture of cream of tartar and soda, or soda and sour milk. She may not get the proportions quite right, but she knows her food is safe. But does she ever use a mixture of alum and soda? Was there ever a housekeeper who bought alum and soda to make a home made baking powder? Intuitively she feels it would be unsafe.

Then why use baking powder made from alum or the same mixture that the housekeeper would not dare to mix and use in her food?

Alum is alum, whether bought in the drug store or in baking powder.

# DR. PRICE'S CREAM BAKING POWDER

is made from pure cream of tartar and contains no alum, lime or phosphate. There is absolute safety in its use.
