(Special to The Daily News.)

London, Nov. 24.—The Bulgarians have again been defeated in southern Serbia. The advance of the Austro-German forces is not so rapid as has been indicated in Berlin despatches.

Fate of Monastir.

The fate of Monastir is still hanging in the balance. It is believed that the Bulgarians are waiting for the Germans to take the city in order to avoid Greek susceptibility.

Greek Assurances.

Athens, Nov. 24.—The Entente ministers today received assurances from the Greek cabinet that Greece will neither intern nor disarm any Allied troops which may enter Grecian territory.

It is reported that Lord Kitchener informed the Greek officials that Britain would have 4,000,000 men in the field by next March, and, in addition would be in position to provision and arm 6,000,000 more Russians.

FRENCH GOVERNMENT TO FAVOR WOUNDED

Paris, Nov. 23.—The chamber of deputies today adopted a bill giving preference in the government service to men mutilated or disabled in the war. This preference extends to every branch of the civil service and not merely to one half of the places, as had been ordered under a ministerial decree. Amendments to the measure were accepted giving the preference among the mutilated or disabled, to those who were the fathers of the largest families. Another amendment voted unanimously was that places should be reserved also for disabled soldiers in monopolies subsidized by the state.

"CHINESE" PORK AT THE CITY MARKET

City Market, Nov. 24, 1915.

Dear Sir:—Knowing how busy the members of the Trades and Labor Council are, I may save their time by stating that the Chinaman (?) who sent the pork to the city market was T. H. Tomlinson, of Meanskinisht. In order to reassure the public, I may say that Mr. Tomlinson's letter is at the market and may be seen on application to me.

Yours truly,

F. B. HOLLAND, Market Clerk.

TRADES AND LABOR COUNCIL MEETING

At the meeting to the Trades and Labor Council last night, it was reported that pork, raised by Chinamen, had been offered for sale at the city market. In the absence of verification, the matter was left to a committee to be investigated.

The relationship of the Trades and Labor Council and the city council was discussed and it was decided to give the representatives of labor on the municipal council an opportunity of addressing the labor men on the year's work. The question of the employment of married men instead of single by the city was also freely discussed, but no decision was reached as to making representations on the subject.

On a request being made to the council it was decided to assist "Curley" Smith to obtain compensation, he having met with an accident while engaged on construction work on the G. T. P.

AMERICA LOOKING FOR NEW HALIBUT GROUNDS

An interesting article, describing the efforts of the United States government to discover new halibut banks in the south, appears in the News-Advertiser of Saturday. The only discovery of any account was the bank off the Columbia river mentioned in The Daily News last May, and which was only of service to the fishermen for a few weeks. As warmer weather came along, the fish at this part of the coast became "mushy" and the fishermen again moved into northern waters. From the fact that the American Bureau of Fisheries' steamer Albatross, which carried out investigations last summer, has been commissioned to continue the work next year, it is evident that the United States government is satisfied that the halibut fishing industry depends chiefly on the location of the fish, and not on artificial means of fostering the traffic.

The closing part of the article is of interest to Prince Rupert people, as it is probably entirely fresh news to them:

Prince Rupert Suffers.

"The discovery of this new bank worked some injury to Prince Rupert as a halibut receiving station, but helped Vancouver and Seattle greatly because last spring the Vancouver and Seattle boats were getting ready to start on long trips to Behring Sea, when suddenly the tables were turned, and the Prince Rupert boats had to make an equally long trip down the coast to get the best fishing. So to some degree the future of Vancouver as the headquarters of a lucrative fishing industry depends on the efforts of the Albatross."
