IN THE LETTER BOX

(Continued From Page Two.)
1915 the consumption of gasoline in the Dominion was over 1,300,000 barrels.
Most of the gasoline refined in Canada is manufactured from United States crude, as the production of crude oil in the Ontario field is not large. Unfortunately the great increase in the number of gasoline consuming machines has not been followed by a proportionate increase in the production of crude oil, in fact some of the large naphtha producing crudes in the States have shown a marked falling off in production. The great Cushing field in Oklahoma is now producing considerably less than 100,000 barrels per day, as against 300,000 barrels per day, which it was producing a year ago.
The decrease in the production of naphtha bearing crudes has caused the price of this grade of crude oil to soar, and refineries are now paying from two to three times as much for crude as the price paid a year ago.
The price of gasoline in London, England, at the present time is 60 cents per gallon. Our price at Prince Rupert is on a ratio with the prices paid in New York.
Our hope is that some inventive genius will evolve a practical kerosene carburetor which would enable a large proportion of the motor driven vehicles to operate on refined oil as fuel.
Yours truly,
G. A. WOODLAND.

How Brown Learned How.
There is a man who makes shoes for children—and sells them to stores all over Canada. But he is only just learning how people buy.
It was this way: His wife—let us call her Mrs. Brown—phoned to him and asked him to buy some underwear for little Brown.
Picture Brown now among the throng of mothers at the "Children's Underwear" counter. He asks for Underwear for a child of six. He looks it over helplessly. What on earth does he know about Children's Underwear? For lack of anything better to say he asks: "Is this good quality?" The answer is short and quite conclusive: "It's Blank's"—naming a well-advertised line. That short word says everything. Brown pays his money and goes home, quite satisfied with his purchase.
Now what bothers Brown—a manufacturer of shoes, is this: How would it affect the purchase of a child's shoes if the salesman said "They're Brown's"?
Nobody knows Brown's shoes. Brown doesn't advertise.
The name Brown signifies nothing when used in connection with children's shoes. The salesman must use all his persuasive wiles to induce people to buy them.
The point is—If the name Brown was as synonymous with Children's Shoes as "Blank's" is with Underwear, wouldn't Brown sell more shoes with less effort?
