

HE STRUCK IT RIGHT AT LAST

After Suffering Almost Two Years, "Fruit-a-tives" Brought Relief.

MR. WHITMAN
1674 Esplanade Avenue, Montreal.

"In 1912, I was taken suddenly ill with Acute Stomach Trouble and dropped in the street. I was treated by several physicians for nearly two years. I was in constant misery from my stomach and my weight dropped down from 225 pounds to 160 pounds. Several of my friends advised me to try 'Fruit-a-tives' and I did so. That was eight months ago. I began to improve almost with the first dose. No other medicine I ever used acted so pleasantly and quickly as 'Fruit-a-tives', and by using it I recovered from the distressing Stomach Trouble, and all pain and Constipation and misery were cured. I completely recovered by the use of 'Fruit-a-tives' and now I weigh 208 pounds. I cannot praise 'Fruit-a-tives' enough."

MINERAL ACT

Notice to Delinquent Partners.

To G. W. Maxwell and Charles Nicholson. TAKE NOTICE that whereas I have done and caused to be done assessment work on the Wolf Mineral claim, situated at the head of Alice Arm, Observatory Inlet, in the Skeena mining division of Skeena district, assessment work for the years 1913, 1914, and 1915, and have paid for said work and recording same, the sum of \$307.50. Unless you pay me the sum of \$231.50, for your share of the said assessment work, together with the cost of this advertisement, I shall, at the expiration of ninety (90) days from the date hereof apply to the mining recorder at Prince Rupert, B. C., to have your interests in the Wolf mineral claim vested in me, in pursuance of the provisions of the mineral act.

Dated at Prince Rupert, B. C., this 19th day of February, 1916.
J. E. STARK.

BIOLOGICAL STATION FOR PRINCE RUPERT

The Canadian Fisherman, in its current issue, states that Prince Rupert, which is rapidly becoming the fishing centre of British Columbia, should have a biological station equipped for research work, with an aquarium attached and a small permanent scientific staff in charge. It states that representation should be made to the Federal government by the Board of Trade and public bodies, and that an initial expenditure of \$25,000 would be justified in the light of what Prince Rupert is now and will be as a fishing port.

"Research, getting the facts of life habits of fish, and instruction by reports, lectures and an information bureau are the two principle functions of a biological station. Research work, on its economic and scientific side, is the main objective, but with it should go popular instruction and stimulation of interest in biology, which can be afforded only by a well-equipped and scientifically maintained aquarium. The aquarium in Battery Park is one of the sights of New York and has awakened interest in fish life and fish food in the United States. An aquarium at Prince Rupert would bring tourists from the ends of the earth."

The article states that the increasing demand for fish makes it imperative that science should be brought to bear on every phase of the industry and likens a biological station to the experimental farm. It concludes thus: "Prince Rupert is ideally located for a great national biological station. It is on the main lines of travel by rail and water across the continent, and also across the world. The varied richness of Pacific Ocean fauna and flora are unequalled in Britain. The different types of fish and marine plants are easily accessible, the

2,000,000 Belgians Depend on us for Bread!

Since shortly after the German invasion, the Belgians have depended for food entirely on the "Commission for Relief in Belgium". Their own store of food, even if not destroyed or pillaged, would last only three weeks—they have had no chance to raise more—and the ruthless Germans refuse to supply them!

Backed by the

Belgian Relief Fund

so generously contributed in the British Empire and the United States, the neutral Belgian Relief Commission has imported enough wheat, flour and other foods to feed the whole nation so far. The great majority of the 7,000,000 Belgians left in the country have been able to pay for their daily allowance of bread—but a steadily growing number have no money left.

Unless we are willing to let these hundreds of thousands of women, children and old men starve, they must be fed at the expense of the Belgian Relief Fund. To make this possible someone must contribute nearly \$3,000,000 a month—every month—all this winter!

No people under the Allied Flags are as well able to contribute generously as we Canadians! No cause has ever been more deserving of help! In the name of Justice and Humanity—for the sake of our own self-respect—let us give all we can to help our martyred Allies!

Production and Thrift

"To win the war with the decisiveness which will ensure lasting peace, the Empire will require to put forth its full collective power in men and in money. From this viewpoint it is our true policy to augment our financial strength by multiplying our productive exertions and by exercising rigid economy, which reduces to the minimum all expenditures upon luxuries and non-essentials. Only in this way shall we be able to make good the loss caused by the withdrawal of so many of our workers from industrial activities, repair the wastage of the war, and find the funds for its continuance. It cannot be too frequently or too earnestly impressed upon our people that the heaviest burdens of the conflict still lie before us, and that industry and thrift are, for those who remain at home, supreme patriotic duties upon whose faithful fulfilment our success, and consequently our national safety, may ultimately depend."
SIR THOMAS WHITE, Minister of Finance.

**PRODUCE MORE, SAVE MORE.
MAKE LABOUR EFFICIENT.
SAVE MATERIALS FROM WASTE.
SPEND MONEY WISELY.**

LET US PRODUCE AND SAVE—

The war is now turning on a contest of all forces and resources—men, munitions, food, money. The call to all is to produce more and more. It may be necessary to work harder. The place of those who enlist must be taken by those at home, men and women, old and young. The more we produce the more we can save. Produce more on the farms and in the gardens. Save more and help to win the war.

LET US NOT WASTE OUR LABOUR—

In this war-time all labour should be directly productive or should be assisting in production. Make it as efficient as possible. If your labour is on something that can be postponed, put it off till after the war and make your labour tell now. Making war is the first business of all Canadians. Efficiency in labour is as important as efficiency in fighting.

LET US NOT WASTE MATERIALS—

Begin at home. The larger portion of salaries and wages is spent on the home—food, fuel, light, clothing. Are any of these things being wasted? \$20.00 a year saved from waste in every home in Canada will more than pay the interest on a war debt of \$500,000,000.

LET US SPEND OUR MONEY WISELY—

Are you spending your money to the best advantage? What do you think of extravagance in war time? Tens of thousands of Canadians are daily risking their lives for us at home. Is it not our duty to be careful and economical? Canadian dollars are an important part of the war equipment. Make them tell. Have a War Savings Account. Buy a War Bond.
