Evacuating Monastir.

London, Sept. 20.—It is unofficially reported that the French and Serbians have surrounded the Bulgarian army which was retreating towards Monastir and that the Bulgarians are evacuating Monastir.

Northwest of Saloniki the Bulgarians made counter attacks upon the Serbians but were driven back. The French, who occupy Florina, are being left alone by the enemy, the Bulgarians making no attempt to re-take the town.

ALICE ARM SILVER PROPERTY OF PROMISE

The silver property in which John Munro and his partners are interested is called La Rose and La Rose No. 1 and is situated seven and a half miles from the head of Alice Arm and six miles in on the Dolly Varden trail. The assays run as high as \$700 to the ton and the average is \$100 per ton. A contract has just been let for the putting in of a 200-foot drift on the ledge. They have from fifteen to twenty tons of ore on the dump. Samples of ore from this property are displayed at the Exhibition. That the mine will prove as valuable as its namesake in Cobalt will be the hope of all Jack's friends.

CASUALTIES ON WESTERN FRONT ARE VERY LIGHT

Artillery Fire and Motor Attacks Saved the Men—Heavy Rain Interferes—British Air Raids.

(Special to The Daily News.)

London, Sept. 20.—On account of the splendid work accomplished by the heavy artillery batteries and the use of the great new armored motor cars in the recent fighting on the Somme front, the Canadian casualties were exceedingly light compared to the previous engagements.

Directed from the air, the heavy British artillery poured a terrific and accurate fire into the German lines, levelling the trenches and filling them up with dead. The infantry attacks of the British and Canadian troops were preceded by the new form of automobile attack and the work of the men on foot was made comparatively easy. The Canadian troops captured the town of Courcellette in great style.

The situation on the Somme front is unchanged today as very heavy rains have interfered with military operations.

On other parts of the western front there is activity, the Germans making five attacks upon the Russians. The enemy was driven back by machine gun and artillery fire.

Air Raids.

A squadron of British aeroplanes made successful raids to the north of Richebourg, northwest of La Bassée. Five of the British machines are missing.

OFFICIAL NOTICE OF MAJOR M'MORDIE'S DEED

The following is the official announcement of the granting of the D. S. O. to Major M'Mordie, taken from the London (Ont.) Advertiser. The gallant major's mother lives in London, Ont.

"Major Stewart Percival M'Mordie, Pioneer, for conspicuous gallantry and devotion to duty in notably assisting to consolidate newly won trenches. Though severely wounded in the head and arm he stuck to his post till the company was withdrawn."

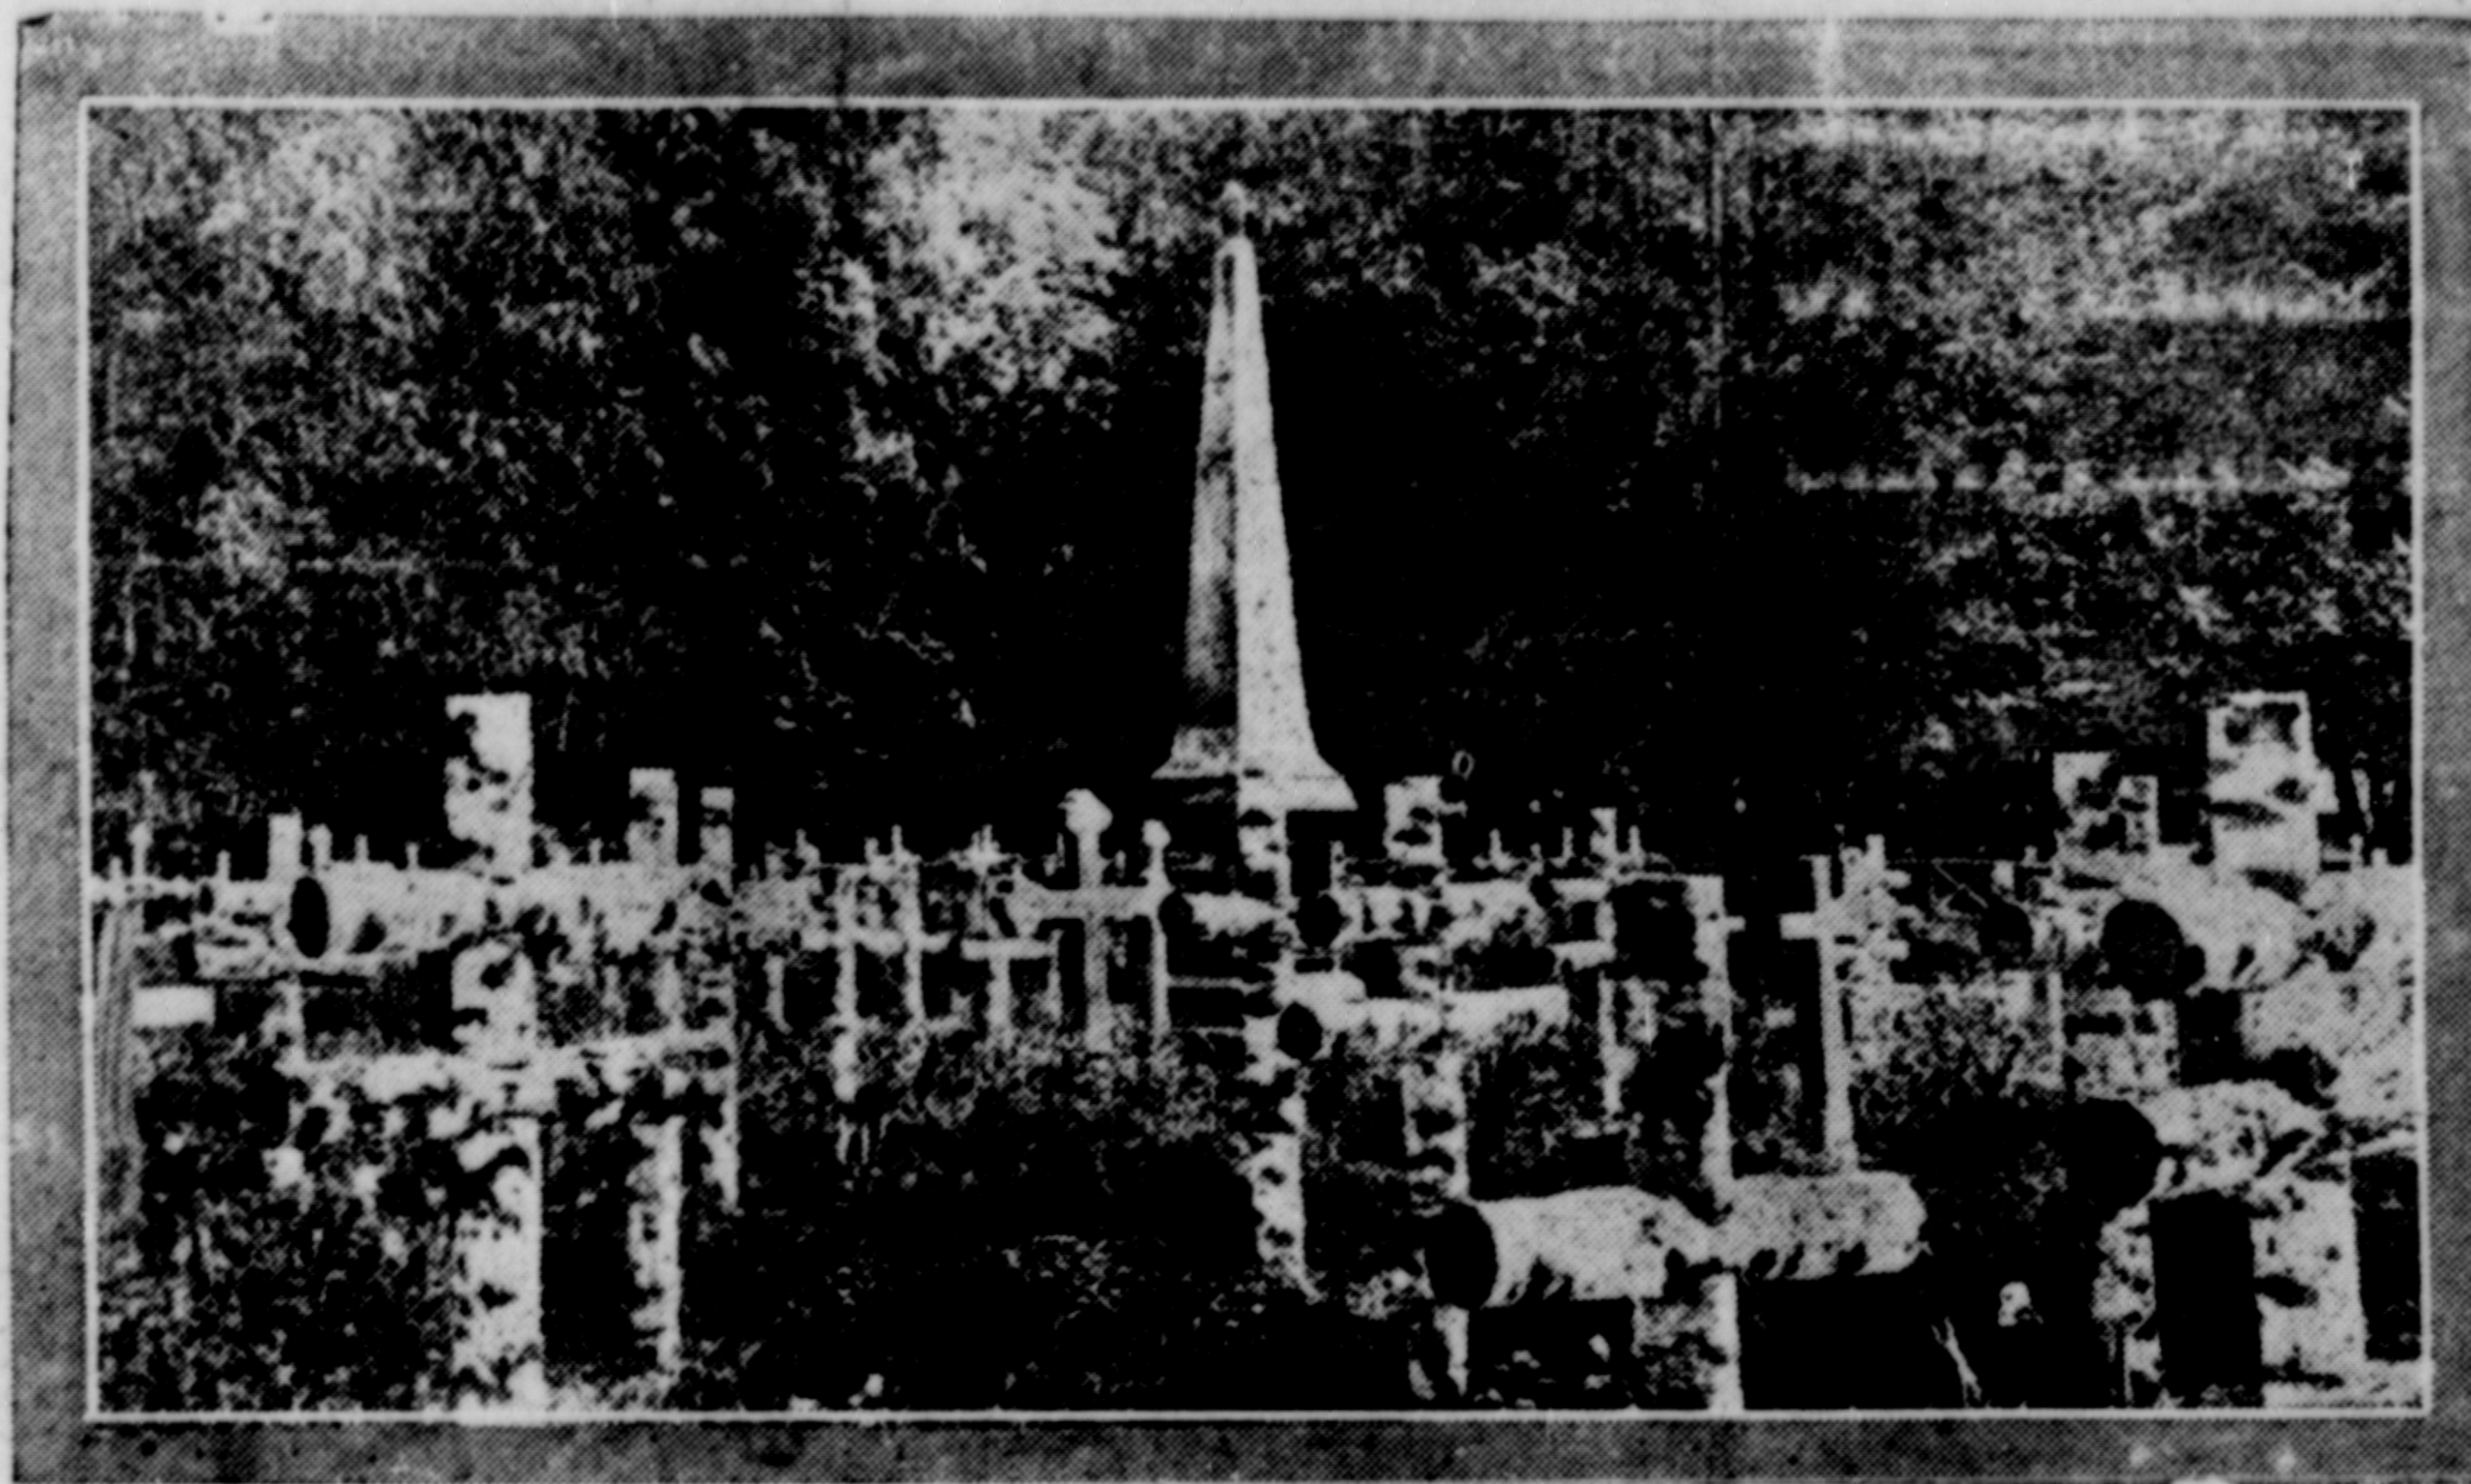

Major M'Mordie was transferred from the 48th Battalion, in which he enlisted, to the 3rd Pioneers.

WHERE RUSSIANS AND FRENCH LIE SIDE BY SIDE.—Picturesque corner of a military graveyard in Northern France where Russians and French who have fallen on the western front are buried. The marks on all the graves are crosses—the Russians being distinguished from the French by crosses with a double bar—the Greek Church Cross. These "monuments" are made of the pretty French birch trees.

MAYOR M'CAFFERY OPENS EXHIBITION

At one o'clock this afternoon, Mayor McCaffery declared the Exhibition open. In a very appropriate little speech, he welcomed the visitors from the surrounding districts and thanked them for their splendid efforts in providing Prince Rupert with the material for such an exhibition. He said that the city depended for its upbuilding upon the outside districts, while the people on the outside would more and more look to this city as an outlet for what they produce. The city and the farming and mining districts are inter-dependent on each other, the growth of one making for growth in the other.

As usual, the building is beautifully decorated and the exhibits are tastefully displayed. In spite of a poor season in general, the district exhibits are of a very high order. Of particular interest to citizens is the Bulkeley exhibit on account of the fact that it displays oats, wheat and barley grown by A. J. Prudhomme, the president of the association, on his ranch near Telkwa.

The mining exhibits are by far (Continued on Page three)
