LLOYD GEORGE The discovery of the war, so far as Great Britain is concerned, is undoubtedly David Lloyd George. The "little Welsh attorney" had, of course, made a name for himself as a statesman years before the war was ever dreamt of, but not even his closest friends imagined that the plucky little Welshman had the ability to rise to such an occasion as he has done.

Mr. Lloyd George is a native of Criccieth and served his apprenticeship in law with an uncle, who also directed his schooling. Aspiring to political fame, he had no difficulty in getting his countrymen to elect him to the House of Commons. His radical views appealed to them and he had a gift of fiery oratory which carried conviction. He had a long spell of hard work and splendid training on the front Opposition benches during the reign of the Balfour government and he was a sore thorn in the side of the late Joseph Chamberlain, who was Foreign Secretary during the dark days of the South African war.

When Balfour was defeated in 1906, Mr. Lloyd George was given a seat in the Campbell-Bannerman cabinet, but it was not until he became Chancellor of the Exchequer in the Asquith government that he began to stir things up. His raids on the earnings of the large corporations, by way of increased income tax on unearned increment; his increased death duties, and his effort to solve the land problem in Britain established his fame among the Radicals and brought him many bitter enemies amongst the wealthy classes. His old age pension

scheme and plan of state insurance, which were both bitterly opposed, even by men in his own political party, added lustre to his career and he was paving the way for greater reforms when the war broke.

A man of dynamic energy and wonderful ability to grasp the salient features of a situation, the sworn enemy of militarism and a man termed "pro-Boer" in the days of the South African war, many wondered just how he would make out in the great struggle. He has done wonders, and perhaps the greatest spur to his efforts was that he was fighting the detested militarism. Naturally a fighter, the gallant little lawyer seems to have been in his element from the beginning, and the more work he was given to do, the greater capacity for work did he seem to develop. As Minister of Munitions, he placed the production of war material on a sound business-like basis and brought unity and co-operation where everything had been done in haphazard fashion.

While he was filling this difficult position, the trouble broke out in Dublin. A man was needed, and immediately found, in Lloyd George. When Kitchener's death shrouded the Empire in gloom, the question in the minds of all was "Who can succeed him?" Lloyd George was the answer, and the correct answer. He is not a soldier, but he seems to possess a remarkable faculty of being able to rise to any and every occasion. Probably it is the Celtic temperament, but certainly it is largely an infinite capacity for hard work. His latest speech on the war has sent a thrill throughout the Empire, just as his radical

speeches from the platform thrilled his audiences. Perhaps the most remarkable result of his magnificent work in the great crisis is that many thousands of men who hated even to hear his name mentioned some years ago, are today numbered amongst his greatest admirers and staunchest supporters. He is undoubtedly the man of the moment.

WHY NEWSPRINT IS ADVANCING IN PRICE

Simple things have a way of becoming complex the moment you look beneath the surface. Take paper, for instance. Most of us, if asked to tell the ingredients of common paper—the paper of this newspaper, perhaps—would mumble something about trees, rags, or wood pulp, and let it go at that. Few of us know that the manufacture of paper is largely a chemical proposition, its quality and color depending on acids and aniline products. And some of the most needed and common chemicals have skyrocketed in price during the past twelve months, owing to the cessation of German exports to us.

To be more specific: Casein, alum, and soda ash, all of them very necessary ingredients in the making of paper, have increased three hundred per cent in cost since the war began; rosin, used Continued on Page Three
