

## THE ONLY MEDICINE THAT HELPED HER

"Fruit-a-tives Again Proves its Extraordinary Powers"

ROCHON, QUE., March 2nd, 1915.  
"I have received the most wonderful benefit from taking 'Fruit-a-tives'. I suffered for years from Rheumatism and change of life, and I took every remedy obtainable without results. I tried 'Fruit-a-tives' and it was the only medicine that really did me good. Now I am entirely well—the Rheumatism has disappeared, and the terrible pains in my body are all gone. I hope that others, who suffer from such distressing diseases, will try 'Fruit-a-tives'." MADAME ISAIE ROCHON.  
50c. a box, 6 for \$2.50, trial size, 25c. At all Dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

Salvation Army.

Public meetings, Tuesday, Thursday and Saturday at 8 p. m. Sundays at 7:30 p. m.

## Coughing scatters germs—Stop it

Coughing increases the irritation of the already inflamed mucous membranes and is moreover apt to carry disease to others.  
Mathieu's Syrup of Tar and Cod Liver Oil promptly stops coughing, and soon, thanks to its tonic properties, effects a permanent cure.  
The wonderful popularity of Mathieu's Syrup of Tar and Cod Liver Oil is specially due to its great value as a permanent lung and bronchial healer.  
Sold everywhere, 35c large bottles.

## BRITAIN'S FORESIGHT SAVES WORLD FROM BIG INCREASE IN THE PRICE OF RUBBER PRODUCTS

Financing and Fostering of Rubber Plantations in Her Colonies Now Proving a Boon to the Consumer in Keeping Prices Down.

The beneficial results accruing to the sagacity and farsightedness of the British government in its promotion of the rubber industry and its subsequent "friendly" cornering of the crude rubber market are just now making themselves manifest in the manufacturing end of the industry. With other staple products soaring in price, and the consumer faced on every side with the augmented cost of raw materials, it is gratifying to know that one article of common use, at least, is not only not increasing in price, but has decreased even under the extreme pressure of war orders.

When Great Britain began the fostering and financing of rubber plantations in 1893, the rubber world did not stand aghast; but smiled cynically. South America—Brazil, to be exact—was then producing practically all of the world's supply, and the rubber, crude indeed, that was coming from the wild trees of that country, was considered quite enough. Great Britain foresaw conditions, however, and aided the establishment of plantations in her tropical colonies, with the result that when the motor industry and affiliated and allied manufactures demanded an increased supply

Great Britain was there with the product.

Today South America is producing about the same quantity of crude rubber and it constitutes only 23 per cent of the world's supply. While the United States uses about 50 per cent of the rubber of the world, over 75 per cent of the crude rubber is marketed and controlled by Great Britain.

In 1910 the demand for rubber began to increase materially. The world's production, both wild and plantation, for that year was 70,500 tons, and the cost three dollars a pound. The estimated crude rubber to be used in 1916, based on previous years, will be approximately 202,000 tons, put to varied uses, yet the price is now between 60 and 70 cents a pound—just about half what it was at the beginning of the war.

Such conditions are in a measure a godsend to the consumer—to the man who walks and wears rubbers and overshoes; as well as to the man who uses the rubber for his motor car tires. And the rubber-wearing individual can thank the British government for this. While Britain has just given a single order for 2,000,000 pairs of hip length rubber boots for her soldiers, taking 14,000,000 pounds of rubber, and other materials, still the price is kept down by that mysterious force known as "government control."

In the meantime that other staple—leather—has increased in price since the war started, until today a single cowhide is worth as much as was paid for the whole cow a few years ago. This is due in a large measure to the quantities of leather used for the army, the cutting-off of the European supply, which came largely from Russia, and other quickly recognized factors, including the fact that there is no "government control" concerned.

With leather up and rubber down it is naturally following that rubber is fast becoming a (continued on Page Four.)

### MINERAL ACT

NASTURTIUM, IRIS FRACTION, BELLIS FRACTION, GENTIAN, BLUE BELL FRACTION, COSMOS FRACTION, THISTLE FRACTION, MARIGOLD FRACTION, LILAC FRACTION, FERN FRACTION, PINE APPLE FRACTION, COXCOMB, BEGONIA FRACTION, MINERAL CLAIMS situate in the Queen Charlotte District, located at or near Ikeda Bay, Queen Charlotte Island, Province of British Columbia, and lawfully held by Ikeda Mines Limited.

TAKE NOTICE that I, John A. MacInnis, solicitor for Ikeda Mines Limited, free miners' certificate No. 70354 B, intend after the expiration of sixty days from the date hereof to apply on behalf of the said Company to the Mining Recorder for a certificate of improvements for the purpose of obtaining a Crown Grant to the above claims.

AND FURTHER TAKE NOTICE that action under Section 85 of the Mineral Act must be commenced before the issuance of such certificate of improvements.

Dated this 31st day of May, A. D. 1916.  
JOHN A. MACINNIS,  
Solicitor for Ikeda Mines Limited.

### LAND ACT

Vancouver Land District—District of Coast, Range 3.

TAKE NOTICE that Archie Barnes Martin, occupation mill manager, of the city of Vancouver, Province of British Columbia, intend to apply for permission to purchase the following described lands:

Commencing at a post planted on the south shore of Cousins Inlet about five chains west of the southwest corner of Lot 31, Range 3, Coast District; thence south 20 chains, thence west 40 chains, thence north 20 chains, thence west 35 chains, thence north 18.5 chains more or less to H. W. M. of Cousins Inlet, thence following the H. W. M. to this post and containing one hundred and twenty-five (125) acres more or less.

DATED at Vancouver, B. C., this 1st day of November, A. D. 1916.  
J. 21. ARCHIE BARNES MARTIN.

### MINERAL ACT

Rivermouth Fractional mineral claim, situated in the Skeena Mining Division of Cassiar District.

Where located:—At the head of Alice Arm, adjoining the Rivermouth and Cariboo mineral claims.

## Britain Has Solved The Rubber Riddle

Rubbers and Overshoes Are Cheap as Ever Today, While Other Necessities, Particularly Shoes, Have Nearly Doubled In Price.

Rubber has been one of the most insistent and intensely interesting problems of the twentieth century—and its solution is proving of vital importance to the Empire in this great war.

Until 1910 the world depended for its crude rubber on the forests of South and Central America and Africa. The supply increased slowly, if at all, while consumption, since the advent of the motor car, has grown enormously. From an average of \$1.00 a pound in 1908, the price jumped to \$3.00 in 1910. Manufactures of rubber kept pace—no doubt you remember what rubbers cost for a year or two—and the situation looked alarming.

The search for synthetic rubber was redoubled in vigor. German chemists had been working on it, and the world seemed to expect them to come through with some ingenious process for manufacturing rubber from its known ingredients, on a commercial scale and at a low cost. But the world still waits—and so does the Kaiser, judging from his indignation over Britain's refusal to let him import rubber by registered mail.

Relief from a rubber famine came instead from the far-sighted development policy of Britain's Empire builders, who for years, in spite of general ridicule, had been encouraging the growth of plantation rubber on a large scale in Ceylon, Sumatra, Java and the Malay States. Money was advanced to planters to carry them through the seven-year period before the trees started to produce, and hundreds of thousands of acres were planted.

By 1910, when the pinch came, British plantations produced 8,200 tons—11% of the world's output. The next year saw 14,000 tons of plantation rubber—nearly 20%. In 1912 it had grown to 29%—in 1913 to 44%—in 1914 to 59%—last year to 68%—or 107,367 tons. This year's production is estimated at 150,000 tons, or 75% of the world's supply.

With three-quarters of the rubber production thus controlled by Great Britain, and the seas in the grip of her mighty fleet, the Allies are assured of an abundant supply for war purposes, while the Teutons' troubles from lack of it are growing daily more serious.

Having a practical monopoly of the supply, and the power to impose such prices as she chose, Great Britain has made it, except to her enemies, a benevolent monopoly, and has set the price of crude rubber lower than it was before the war.

To Canadians this is doubly important, because the climate makes rubbers and overshoes a necessity. Now, when shoe prices are soaring, while rubbers are as cheap as ever, it is clearly economy to protect expensive shoes to the limit by systematically wearing rubbers at every sign of bad weather. Even with heavy soled shoes this pays, for shoes so protected will wear far longer, saving the cost of the rubbers several times over. Besides the big money saving, there is the valuable protection to health. Wet feet and colds go hand in hand, with a ghastly train of ills—easily avoided by wearing rubbers.

Then there is the patriotic side. Vast quantities of leather are absolutely necessary for the army, and the scarcity is growing. Every pair of shoes we save helps to ease the situation, and so serves the Empire to which we owe this welcome cheapness of rubbers.

Save your Shoes and Serve the Empire!

2,000,000 Belgians Depend on us for Bread!

Since shortly after the German invasion, the Belgians have depended for food entirely on the "Commission for Relief in Belgium". Their own store of food, even if not destroyed or pillaged, would last only three weeks—they have had no chance to raise more—and the ruthless Germans refuse to supply them!

Backed by the

## Belgian Relief Fund

so generously contributed in the British Empire and the United States, the neutral Belgian Relief Commission has imported enough wheat, flour and other foods to feed the whole nation so far. The great majority of the 7,000,000 Belgians left in the country have been able to pay for their daily allowance of bread—but a steadily growing number have no money left.

Unless we are willing to let these hundreds of thousands of women, children and old men starve, they must be fed at the expense of the Belgian Relief Fund. To make this possible someone must contribute nearly \$3,000,000 a month—every month—all this winter!

No people under the Allied Flags are as well able to contribute generously as we Canadians! No cause has ever been more deserving of help! In the name of Justice and Humanity—for the sake of our own self-respect—let us give all we can to help our martyred Allies!

Send your subscriptions weekly, monthly or in one lump sum to Local or Provincial Committees, or to the

Central Executive Committee, 50 St. Peter St., Montreal
