### SPRING FASHIONS IN MILLINERY ALREADY SHOWING

This chic bonnet, a smart Smolin model for sportswear, is made of white Georgette crepe edged and daintily trimmed with a band of navy and Copenhagen blue crochet work. The cluster of grapes at the side, of the same combination, is another feature that adds distinction to the hat. This model gives a good idea of what the coming styles will be.

The Christmas celebrations were scarcely noticed in the police department, there being only one case of "drunk and disorderly." Chief Vickers had only two prisoners on his hands over Christmas and these were given a turkey dinner yesterday, the plum pudding not being omitted.

Mrs. L. J. Bay, Mr. H. A. Harvey and Mr. J. H. McMillan rendered special Christmas music in the Presbyterian Church on Sunday evening. Mr. Stewart Langille, of Winnipeg, sang "The Star of Bethlehem" and the choir gave a number of Christmas carols. Rev. Dr. H. R. Grant preached a most impressive sermon on "Peace on Earth, Good Will Toward Men."

### HOW STEEL HELMETS ARE MANUFACTURED

The steel helmets adopted by the French and British weigh from 4 1/4 to 4 3/4 pounds each. The materials employed in the making consist of plates of steel for the convex helmet and for the visor and neck piece, leather and cloth for the lining, and aluminum to make the waving "plaquettes" which form the springs between the lining and the interior surface of the steel. The rolled steel plate has to be supplied enough to be worked cold, as heating would lessen its resisting qualities. A special steel obtained from very pure castings, free from phosphorus or sulphur, has therefore to be used. The outer lining is made of sheepskin, whilst for the inner old cloth is utilized.

The helmets are coated with a dull grey similar to that of the '75 gun, which is difficult to distinguish at a very short distance. The spraying process used has the advantage of being very rapid and of giving no inequality of surface, besides drying almost immediately. The interior of the helmet is pointed by the same process. To add to the permanence of the paint the helmets are then suspended on bars in a gas-oven, where they are thoroughly dried.

The lining consists of a cloth cap, to which is fixed a segment of black glazed (glace) leather cut in a particular form. Each skin provides at least five linings, so that for 3,000,000 helmets 600,000 sheepskins have been used. The lining projects a trifle below the

### Killing the Calves

All sorts of excuses are offered for the high price of beef, the most plausible being the alleged demand for veal—"the killing of calves which should be allowed to grow into regular beef." You cannot have beef if you eat it as "veal," but you can have **Shredded Wheat Biscuit** which contains more real nutriment than beef and costs much less. Shredded wheat biscuit is the whole wheat steam-cooked, shredded and baked. Make it your "meat" for ten days and see how much better you feel. Wholesome and strengthening for any meal with milk or cream or in combination with fruits.

### "FIRE-THROWERS" WERE USED CENTURIES AGO

The German flammenwerfer, or "fire-throwers," so far from being "new," are hoary with age. They were used at the siege of Constantinople by the Turks five centuries ago, when sheets of flame were vomited through long copper tubes; and centuries earlier still, our own warships had tubes fixed at their prows through which "Greek fire" was spouted at the enemy.—Tit Bits.
