THE MERCHANTS RUBBER

Wearing Rubbers during the Spring Months of Slush and Wet Saves more than their Cost and Protects the Health as well

It is only recently that the high retail prices of most commodities are being felt. The higher cost of living as a result of the war, is now manifesting itself in EVERY walk of life.

Shoe dealers throughout Canada must get more for our rubbers than during the past few years. The cost of production has been steadily increasing and the dealer's expense of doing business is greater.

To-day crude rubber is fully one-third higher than before the war, and doubled freights, abnormal insurance and the war tax have made it more expensive laid down at our factories. Other materials, including cottons, cashmerettes, jersey, linings, dyes and chemicals cost on an average 75% more. Labor, too, is away up, and so scarce that there is difficulty in keeping up a normal production.

The increased prices of our rubbers—small indeed compared with other articles of wearing apparel and of food—have been made imperative by the steadily growing cost of manufacturing.

As the quality and reputation of our brands of rubbers must be maintained at all costs, we have been compelled to advance our prices. So when your dealer asks you a little more, it does not mean that either he or the manufacturer is taking advantage of war time, but rather that both are reluctantly yielding to necessity.

In proportion to the cost of other necessities, the prices of our brands of rubbers are reasonable—and more economical when compared with the far greater increases in shoe prices. The regular use of rubbers saves many times their slightly increased cost, and protects the health as well.

To be sure of full value and maximum service, look for the assurance of quality given by any one of these Trade Marks:
