

THE CHIEF CHARM OF A LOVELY WOMAN

Clear, Smooth Skin Comes With The Use Of "FRUIT-A-TIVES".

NORAH WATSON 86 Drayton Ave., Toronto. Nov. 10th, 1915.

A beautiful complexion is a handsome woman's chief glory and the envy of her fortunate rivals. Yet a soft, clear skin—glowing with health—is only the natural result of pure blood.

"I was troubled for a considerable time with a very unpleasant, disfiguring rash, which covered my face and for which I used applications and remedies without relief. After using 'Fruit-a-tives' for one week, the rash is completely gone. I am deeply thankful for the relief and in the future, I will not be without 'Fruit-a-tives'."

THE GOVERNMENT AND THE HIGH COST OF LIVING

(Continued From Page One.)

living until the next general election is over.

In spite of this some of the commissions have simply had to report. They couldn't hold it any longer. They didn't want to expire as it were by the union of time. Most of them had other work to do. So they reported and the Government did nothing about it. These were the more active commissions. The other commissions did nothing at all and consequently made no report, which course, on the whole, suited the Borden Government even better.

A number of these high cost of living commissions harbored a joker in the shape of the Cold Storage King of Canada who was planted in their very midst so he could see what was coming and head it off. This is how earnest the Borden Government was about the high cost of living. It placed the Chief Operator at all the strategic spots where the news might be expected to come first.

To all these commissions another has been added lately which is to go at the high cost of living from the scientific end. A distinguished scientist has been appointed at a distinguished salary to begin a research right away. Evidently he has a life job. He need not report for a long time yet. He has asked a thousand other scientists to help him at nothing a week but glory galore and almost anything is sure to come of it—except an immediate report. This is a great concentrated effort on the part of science not only to help the Borden Government out of a hole, but, eventually, as we take it, to Feed the Poor Without Giving Them Anything to Eat.

This scientific inquest will, of course, go at it both ways, it will not only point out all our natural and unnatural resources, but it will no doubt suggest substitutes for staple articles of diet which, under the Borden Government, have become too expensive for the masses. These substitutes, one may hope, will be

WATER NOTICE

L. 835. The water will be diverted from the stream at a point about ten chains west from N.W. corner of Lot 4, B. C. Fisheries, and will be used for power purpose upon the land described as adjoining Timber Limit 835 in application to lease. This notice was posted on the ground on the 15th day of January, 1917. LAND LEASE NOTICE

TAKE NOTICE that I, William James Matthews, acting as agent for the Anglo-British Columbia Packing Company, Limited, registered office in Vancouver, B. C., of Arrandale, occupation store keeper, intend to apply for permission to lease the following described lands: Commencing at a post driven on the east shore of Portland Canal about a mile and a half north of Dogfish Bay, from thence north twenty chains; thence east ten chains; thence south twenty chains; thence west ten chains. M6 February 11th, 1917. WILLIAM JAMES MATTHEWS, Applicant

somewhat more palatable than, say, sinking one's teeth in the furniture to satisfy a hearty appetite. As a matter of fact even biting the furniture costs too much because, under a forty-five per cent. tariff, furniture becomes too dear to act as a food substitute.

Hay as a substitute for bacon and eggs is out of the question, because the army uses all the extra hay. Bran is cheap yet, and raw bran taken with hot water is said to be good for the digestion, owing to its capillary action. But the moment Premier Borden's food barons get the idea that bran is in popular demand it will shoot up in price, as rice has done already, somebody having mentioned rice in their hearing as a substitute for potatoes. And so it goes. Nothing the public flees to as a refuge from the high cost of living but the food barons get there first and make it more precious than rubies. The War Measures Act is about as useful to stop these greedy fellows as if it didn't exist at all.

The Borden Government has it in its mind that the vacant land problem is going to solve the food problem—bring the untilled soil and the returned soldiers together and the thing's done. This scheme had its origin in the bright mind of R. B. Bennett, M. P., or some other large sequester of prairie lands, who would be glad to sell to the government at a good swinging price the broad, idle acres which produce nothing now but taxes. The only drawback to this scheme is that the returned soldier prefers the city. No lonesome prairie farm for him where he can toil-somely grow wheat which the Borden Government will not let him sell where he pleases.—H. F. Gadsby.
