OF IMPERIAL INTEREST Regarding the appropriation of \$10,000,000, which has been placed at the disposal of the Munitions Board in Canada, for the building of ships, there is a very interesting article under the above heading published in the Victoria newspaper. "The Week," in a recent issue. This article is peculiar, inasmuch as it is the first one of the kind that has come to our attention, coming from Southern British Columbia, recently. "The Week" is to be congratulated. It boosts for Prince Rupert.

"The shipbuilding program of the province appears to be enlarging from month to month," says The Week. "Mr. Bukhart, the managing director of the large cement works on Tod Inlet, and Captain Troup, of the Canadian Pacific Railway, have been summoned East by Mr. Flavelle, head of the Munitions Department, in order to consult upon the Imperial question of building ships for commerce. Ten million dollars has been placed at the disposal of the Munitions Board, the greater part of which is to be spent in British Columbia. Nothing can be more significant to the future prosperity and welfare of the province. There is no reason whatever why this great necessity of the West shall not secure a large place in the activities of the province for all time. Hitherto we have been content to be the recipients of small doles flung to us by chance of the winds and waves in the shape of repair work. and often by grace of our American cousins. A few smaller craft have been built and bear the honored name of, one of the ports of the province as its place of registry. Already there are large and stately ships of commerce being built, equipped and sent forth laden with the productions of our mills."

Busy?"

"Neither must the city of before very long. Prince Rupert be overlooked as a probable competitor for ship-

building industries. There has been already assembled in connection with the Grand Trunk Pacific Railway a magnificent, plant in which the finest modern machinery has been placed. Cheap power can be furnished by the municipally-owned electrical plant, abundance of water flows through the city's mains and huge steel tanks filled with fuel oil, gasoline and distillate are ready at any capacity. In addition thereto, largest ship affoat, or the smallest craft that might seek

its shelter for repair purposes. If the people of the province are but alive to the opportunities of the hour, an era in industrial development appears ready to dawn, an era, The Week hopes and believes, in which Labor and Capital wil find profitable employment."

These facts are stated very conservatively by "The Week." There are many other circumstances, also, that mark Prince Rupert as a suitable centre for shipbuilding. For the building of wooden vessels, the ship shed, which has stood idle since the building of the pontoons for the floating dock, is waiting to be used. It was designed especially for that purthings, orders for new vessels should come to Prince Rupert. Everything is ready. Experimains now with Mr. Flavelle, river. this respect.

## NOTES AND COMMENTS

The seriousness of the food situation is becoming more and Rupert, B. C., occupation prospector, inmore marked. The necessity is tends to apply for permission to prospect "The Week" goes on to tell apparent as it never was before for coal and petroleum on the west coast of the facilities already ob- to have as much grown locally as of Graham Island, in vicinity of West to apply for permission to prospect for taining at Esquimalt and asks, can be done.
