TIN SCARCITY MEANS SHORT SALMON PACK

Seattle, July 4.—Authorities here estimated that the salmon pack of the Pacific northwest for the present season is estimated at 8,000,000 cases, of which 3,500,000 cases will be of the higher grades. That is all the salmon that can be packed for there is no further tin supply available.

The United States government has made inquiries whether any of the pack is likely to go into the hands of speculators, and is also arranging to purchase salmon for the army somewhat below the market price.

Of the pack it is roughly estimated 3,750,000 cases will come from Alaska, 3,000,000 from Puget Sound and the rest from the Columbia river and British Columbia.

PUEBLO MINES WILL BE REOPENED SOON

Returning to Skagway after an extended visit to Whitehorse and Atlin, Mr. F. F. W. Lowie, C. P. R. general agent, reports that both places are very prosperous.

He says that the Pueblo mines will be reopened within the next few weeks and that some of the men are already on the job.

An examination is being made at the present time to ascertain whether the mine can be opened through the old shaft, or whether it will be best to sink a new one. The Pueblo mine has been closed since the accident which happened there several months ago and in which nine men lost their lives through being buried in a cave-in.

Mr. Lowie reports that the weather in the Atlin section has been beautiful and that the mining operators in that section are experiencing one of their most successful seasons.

STEWART NOTES

Owing to the increasing business, the launch Narbethong is now making two trips a week between Prince Rupert and Stewart, instead of once a week as formerly.

Mr. R. K. Neill, who is developing the Bush property on Salmon river, has returned from the south with mining supplies, including a gasoline engine and a blower for ventilating the mine. Drifting on the ore shoot encountered two months ago is being continued with satisfactory results.

Several hundred ft. of rails and dump cars arrived for the equipment of the Tonkin property at Fish Creek.

A party of mining engineers arrived to inspect the E. and F. group, and the Rufus group on the Upper Bear River. They represent San Francisco interests.

Mr. W. H. Magee has resumed work for the season on the North Fork Basin group, on Marmot river.

U. S. TRANSPORTS ATTACKED BY SUBS.

(Special to The Daily News.)

Washington, July 5.—The war has been brought home to the people of the United States by the fact that the transports carrying the troops to France have been attacked by German submarines. Destroyers, convoying the troopships, attacked the U-boats and beat them off. One German submarine was sunk by the gunfire of the convoy. It is considered certain that the news of the expedition was revealed by spies. The forces were landed in France without the loss of man or ship.

CHURCH CO-OPERATION

The business which took Dr. Grant up to New Hazelton last week adumbrates important changes in the policy of the churches. Dr. Grant was chairman of a committee consisting of representatives from the Presbyterian and the Methodist Churches between Alberta and Prince Rupert, along the line of the G. T. P. Their business was to mark out for each church the spheres in which they shall work exclusively in the territory named. It is the beginning of a great co-operative scheme, which is being brought into force in view of the coming union of these two great institutions.

By this means, overlapping will be obviated, and a more thorough and extensive usefulness can be obtained from the organization of each church. Instead of having two separate and distinct churches with their different organizations operating where one would be sufficient, as is prevalent in the older settled communities, by the co-operation of both churches, greater efficiency will be made possible.

ANOTHER AIR RAID OVER ENGLAND

Harwich Bombed for Few Minutes—Suffers Casualties—Mun Machines Driven Off by British Guns.

(Special to The Daily News.)

London, July 5.—A fleet of twelve German aeroplanes appeared over the town of Harwich, on the Essex coast yesterday and dropped twelve or fourteen bombs. The raid only lasted for a few minutes and no attempt was made by the enemy aeroplanes to penetrate inland. British aeroplanes immediately attacked the invaders and the British anti-aircraft guns made good practice. Eight persons were killed and twenty-two injured by the exploding bombs. Harwich is a shipping port of some importance, and before the war was the centre of a large Continental trade.

(Special to The Daily News.)

London, July 5.—During last week, as the result of the continued submarine campaign, fifteen vessels over 1600 tons were lost.

THE ENEMY NERVOUS

The Canadian divisions have the enemy so nervous that he turns on heavy barrage fire at the slightest sign of unusual movement. No greater tribute could be paid to the splendid qualities of the fighting forces of the Dominion. The spirit that has made Canada great in action on the field is the spirit that should animate the whole Dominion. The Government is pleading with the nation to exercise economy in expenditures and practise thrift in all departments of public and private life. It is not given to all to serve their country on the firing line in France but every man and woman in the Dominion can man the financial trenches. They can serve by saving and the road to that service is open to all. Every dollar the country can raise is needed to insure victory. Every dollar you can spare should be invested in War Savings Certificates.

Thomson, will investigate three main questions: 1st, the continuation of boat rating in fisheries district No. 2, particularly whether motor boats are to be allowed in salmon fishing; 2nd, whether any additional canneries are to be allowed in district No. 2; 3rd, whether there should be a prohibition of the export of salmon in fresh state as well as sockeye salmon as now. This inquiry applies to all of British Columbia.
