GERMANS CAN TAP THE BRITISH WIRES

New York, Aug. 14.—A London despatch to The Sun says:—The Germans in France have invented a new device which is automatically projected into the allied lines and grapples telegraph or telephone wires, establishing an electrical connection and enabling the Germans to tap passing messages regarding operations. Prisoners recently taken confirm stories previously told of how the German command obtained exact information of the hour set for attacks.

This new device probably is the most successful means of espionage invented by the Germans. Our soldiers in France have always been mystified by the ease with which the Germans identified new British regiments coming into the front line. When the newcomers arrived they were invariably greeted by placards erected over the trenches or by a hail from the enemy line calling them by name. This ability of the Germans to pick up the latest information undoubtedly came from the use of this hook-like arrangement which is thrown over our telegraph and telephone wires.

SUGAR LIKELY TO BE SCARCE IN CANADA

The abnormal conditions obtaining in Great Britain with regard to its supply of sugar are threatening to extend to the Western Hemisphere as well. In addition to the scarcity of shipping to bring the raw sugar to the refineries, "there is unquestionably a shortage that is proving a very great anxiety to the refiners, who have no assurance that they will be able to carry them over the remaining two months of active trading," according to the Canadian Grocer in its last issue. It says the sugar situation has reached a more acute stage than at any time since the war opened. With the canning season in full swing, and the encouragement being offered the public to go into canning on an unprecedented scale, this presents a very serious situation.

The combined stocks in the United States and Cuba, the Canadian Grocer continues, are 100,000 tons short of the 1916 crop and the British Government has still contracts calling for 200,000 tons, while in addition Argentine requires 50,000 tons to eke out a short crop.

The Cuban sugar handler is making the most of the market, feeding it only such quantity as will ensure the maintenance of a keen demand. Each increase in price has been met with a moderate offering only and experience has proved that there is nothing to be gained by waiting.

As sugar is urgently needed, the article concludes, there is every likelihood that still further advances are to be expected, while the possibility of an actual scarcity is one of the not so remote possibilities.

A Lifebuoy bath means a healthy skin—

First, because it's a good soap—it cleanses thoroughly, though gently. Next, because it is a safeguard against all sorts of germs, infections, etc. that your hands or your clothing may have come in contact with. That's the Lifebuoy story—cleanliness with safety. The slight carbolic odor vanishes immediately.

Where You Cannot Prophecy — PREPARE !

NOT even the best-informed man in government or business circles dares to attempt a prophecy of conditions after the war. We hope for the best—meantime wise men are preparing now for anything.

How?
By regulating their expenditures according to their actual needs rather than by their prosperity—by husbanding the surplus—and by investing to the limit in Canadian War Loans that help so much to maintain present prosperity.

Money saved and loaned to Canada by Canadians is a two-fold safeguard for the future. The lenders will benefit directly from the excellent interest return and absolute security—and indirectly because the interest thus kept in Canada will help to keep business good after the war.

Canadian War Savings Certificates are issued in denominations of \$25, \$50 and \$100, repayable in three years. At the purchase prices of \$21.50, \$43 and \$86 respectively, they yield over 5% interest. Buy them at any Bank or Money Order Post Office.
