GASOLINE AT TWO CENTS

New Haven, Conn., Sept. 4.—That the cry for the giving up of automobile pleasure riding because of gasoline shortage is "bunk"; that there is no limit to the gasoline production of this country, and that the gasoline companies could produce it at much lower prices if they would, is the claim of Lester P. Barlow of the Marlin Arms Company, inventor of the new aerial torpedo adopted by this country, who now declares he can prove that gasoline can be produced at 2 cents a gallon. Mr. Barlow declares that the shortage is not due to lack of natural resources, but to neglect of the improved methods of production. Mr. Barlow said that there is no reason for the ever soaring prices of gasoline, as more than enough to supply every possible need is wasted every year by the companies who prepare it for public consumption. He went on to say that gasoline that has been tested by one of the largest automobile manufacturing concerns in the country and pronounced of the highest grade, has been produced at the cost of two cents a gallon, and can be produced at any time to be sold at a cost not exceeding 15 cents a gallon.

To back this statement up, Mr. Barlow issued a challenge. To show positive proof by making and exhibiting a barrel of gasoline produced at two cents a gallon within a period of a week or two.

Mr. Barlow also stated that methods exist, and are known to the leading concerns dealing in gasoline and all oils, by which the crude produce may be taken from the ground and prepared for use at a cost ridiculously low compared to operation expenses claimed by the manufacturers.

Mr. Barlow said that if Congress should take action which would compel the gasoline producers to make use of the modern and improved methods, a greater step would be taken in the work of conservation so ardently urged by the council of national defence, than they could ever hope to achieve by advising the public to deny themselves the use of it, while laboring under the delusion that it is one of the costliest commodities and soon to be worth its weight in gold.
