Word has been received in town from Bert Craggs, who used to fire for the G. T. P. here. He is now stationed at Salonika with the "Black Watch." Originally he was with the Scottish Horse, but apparently he has given up his horse for a kilt. He finds it fairly hot on the plains, too hot in fact for comfort, but on the hills it is all right. Salonika is surrounded by a great fruit country, he says, there being an abundance of peaches, apricots, plums, pears, apples, cherries, etc. Nevertheless he says "Prince Rupert for me, first chance."

We are in the market for 1 in., 1 1/4 in., and 2 in. HOW SCIENCE PROVED THE VALUE OF SAVING

In 1902, M. Currie discovered the wonderful substance of radium which is today the most precious metal in the world. A sensational feature of the discovery of this metal had an epoch-making influence upon modern life. Radium is obtained from a product of the mines which formerly was thrown away. This French scientist taught the world an historic lesson as to the tremendous waste that goes on in many industries. At once there began the vogue of projects to eliminate waste which has resulted in a much more efficient industrial system. The struggle with waste still goes on.

The present war is a battle of peoples. Every home in Canada is a cog in the Allied machine. Waste in the home means inefficient belligerent machinery of which the enemy will take advantage. A home conducted with patriotic and self-respecting thoroughness and economy, on the other hand, is helping to grind out results at the front. These results, sooner than most people believe, will emerge as a glorious victory if every home does its part, or if the right course is taken in any fair number of homes.

Money saved can be put quickly and effectively to work through the purchase of War Savings Certificates at any bank or money order post office. More than five per cent interest and a clearer conscience assured.
