

## FRIENDS THOUGHT HE WOULD DIE

"FRUIT-A-TIVES" Conquered Dyspepsia and Restored His Health.

MR. ROBERT NEWTON.

Little Bras d'Or, C. B.  
"I was a terrible sufferer from Dyspepsia and Constipation for years. I had pain after eating, belching gas, constant headaches, and did not sleep well at night. I lost so much weight—going from 185 pounds to 146 pounds—that I became alarmed and saw several doctors who, however, did me no good. Finally, a friend told me to try 'Fruit-a-tives'.  
In a week, there was improvement. The constipation was corrected; and soon I was free of pain, headaches and that miserable feeling that accompanies Dyspepsia. I continued to take this splendid fruit medicine and now I am well, strong and vigorous". ROBERT NEWTON.

## NORWEGIAN GOVERNMENT TAKES OVER WHALING

London.—Recently the Norwegian Government appointed a "Fat Committee" to consider the shortage of fats for domestic purposes and to suggest remedies. After a conference with experts the committee, according to reports in the Norwegian press, has reached the conclusion that in present circumstances the whaling industry must be carried on under State control. It is pointed out that all the Norwegian whaling vessels are now in the service of the State, protecting the country's neutrality, so that it is only the Government that can release ships for the use of the industry. On the other hand private firms would not engage in whaling unless they were given concessions and privileges extending over a number of years, and in any case they would demand high prices for the oil and other products. The Fat Committee estimates that under State working the whaling industry could produce 5000 tons of oil. The Provisioning Department, which is in agreement with the conclusions of the committee has, it is stated, already sent an expert to survey the coast and find suitable places for the establishment of State whaling stations, and several have already been chosen. Norway's normal consumption of foreign (imported) fat products for domestic purposes is estimated by the committee at 22,000 tons; all of which must now be produced at home, and in addition to this there is the large quantity required for industrial uses. It will be possible by exercising economy to reduce the consumption, but it is absolutely necessary to increase the home production. The country's production of fish oils (cod liver, herring, seal, and bottle-nose oil) is between 10,000 and 12,000 tons and this, it is thought, can be increased, especially in the case of herring oil. On the other hand there is not much prospect of developing the output of seed oils (rape, linseed, etc.). Thus the most promising field for covering the country's oil defects seems to be the whaling industry.

## Anyone Can Have Whipped Cream

PACIFIC MILK is so rich in cream that it whips as easily as most of the fresh cream sold around the Province.

Mrs. McCary of New Westminster wrote in to say that she whips PACIFIC MILK regularly for a treat for the youngsters for breakfast.

All she does is to set aside the amount she wants, in a cool place, for a time and then beats it with a sieve egg-beater. She puts this on toast and gives it to the children for breakfast.

You'll find it is good on cakes and

## Keep Chickens

This is National Service

They will help Keep you

### How to go about it

BUY eggs for hatching or day-old chicks; borrow or buy a broody hen or an artificial brooder. A slatted packing-box will house the hen and chicks. Feed the chicks bread crumbs soaked in milk and squeezed dry. Feed five times a day, alternating with prepared chick feed, only as much as they will eat up clean. Remember that a hungry chick is a healthy chick.

CAUTION: Chicks must not be fed until at least 48 hours old, and then only sparingly.

If you can, start now with eggs or chicks; if not, arrange at once with the local poultry association for pullets in the fall.

The cost of meat is the heavy item in the food bill.

Poultry and Eggs will help take the place of meat.

The food that goes to the garbage pail from the average table will provide one-third the feed for a flock of 8 to 10 hens.

Poultry will thrive where vegetables will not grow. The outlay is small. A few minutes a day is all the time required.

A small flock in your back yard will go far to keep you supplied with eggs, broilers and roasters.
