ROUMANIA

According to a dispatch yesterday, the little kingdom of Roumania has ignored the ultimatum presented by the German commander to start peace negotiations at once, and she had declared her intention of surviving or perishing with the allies.

The Roumanians are cut off entirely from any assistance from the allies. She can hardly hope for any assistance from her erstwhile friends the Russians, even if her immediate neighbors of that country are Ukrainians.

While it is true that on the east they have the protection of the ramparts of the Carpathians, still on the other hand, their territory is open from the north and the south, with only swiftly flowing rivers as a barrier.

That a little people of this kind, cut off and surrounded, should brave the combined weight of the Central Powers, with all their resources betokens a great spirit. All the more so as the Roumanians well know the penalty which the Germans will exact, if they can.

They have thus set such an example to Russia, that whether they are hounded from the country that is theirs, or whether they are able to maintain themselves in their attitude of defiance to the German power, the name of Roumania will ring down through the years as a name well worth.

er they are hounded from the country that is theirs, or whether they are able to maintain themselves in their attitude of defiance to the German power, the name of Roumania will ring down through the years as a name well worth.

It matters not whether their efforts will be successful, or whether it will have any bearing upon the ultimate outcome of the war, the fact remains that in the face of the greatest odds, the Roumanian spirit was bold enough to take up this stand, justifies their claim to be directly descended from the ancient Romans.

STATESMANSHIP

Lloyd George is at it again. He has put it up to the House of Commons, of which he is premier, that if they are not satisfied with what he tells them, they can get another premier. While no one knows better than he how to handle and appeal to the masses of the people, on this occasion Lloyd George will not tell—he refuses point blank—to tell all that transpired at the Versailles conference of the Supreme War Council.

The cry since the beginning of the war in Great Britain is that the government have consistently refused to take the people into its confidence. There is considerable ground for this complaint, too, as any government that takes the people into its confidence will be more able to retain that confidence which the people have in them.

Let us hope that wonder about the continued idleness will cease, and be transferred to the activity which is due in this part of the world.

Insomnia Cured Without Drugs

Internal Bathing Relieves the Cause

If you do not sleep there is always some cause. Don't start dosing with drugs. Nerves can't consume them. Relieve the cause and a good, sound sleep will be the result.

The system cannot be right if the Colon or large intestine is not kept clean and free from all waste matter. Bathe internally if you want perfect health.

Mr. F. C. Voigt, Rapid City, Man. writes:—"For several years I suffered from indigestion, nervous debility, insomnia and constipation. Had no appetite, and doctors did not expect I would live throughout the winter. Your book interested me. I got a 'J. B. L. Cascade' and in a few days obtained remarkable results. I now sleep and enjoy my meals better than for years before. I regard the 'J. B. L. Cascade' as a Godsend to me."

The 'J. B. L. Cascade' is a perfected appliance for internal bathing, invented by Dr. Chas. A. Tyrrell of New York, and has been the means of restoring thousands to perfect health. It is shown and explained by Cyril H. Orme, Druggist, cor. 3rd Ave. and 6th St., who will be pleased to give you an interesting book called 'The What, The Why, The Way of Internal Bathing' on request. Ask for it.

SHIPBUILDING

On his arrival at Vancouver last Saturday, according to a press report, Mr. W. P. Hinton is reported as admitting that a shipbuilding scheme that may mean big development for Prince Rupert is now being considered.

When it is considered that new shipyards have had to be laid down, shops assembled, with their multitude of machines, and everything built from the grass roots up, in other parts of this coast, and at the same time, nothing done here, where there are machine shops, boiler shops and a foundry ready built, and with dry-dock accommodation as well, it may be realized that there has been good reason for wonder.

Let us hope that wonder about the continued idleness will cease, and be transferred to the activity which is due in this part of the world.
