## IMPERIAL MEASURE IS CANADIAN STANDARD

Ottawa, April 5.—A ruling by the Canadian Inland Revenue authorities makes the use of the United States liquid measure illegal in Canadian trade. The United States gallon is approximately 20 per cent. smaller than the Dominion gallon; more exactly, the imperial gallon in use in Canada is equal to 1.2009 United States gallons. Many complaints have been made in Canada as to the sale of bottled and tinned goods, such as ink, essences, condiments and paints, put up by American houses according to the United States or wine measure unit. American goods measured by the smaller unit have an unfair advantage over similar Canadian goods.

Goods in packages and containers may be put up and sold without any reference to the measure of the contents, or the contents may be indicated by weight in pounds or ounces, but if any reference whatsoever is made to the contents by measure it must be in Dominion measure only.

The Weights and Measures Act of Canada prescribes the use of certain Dominion weights and measures, or the metric system, in all dealing in Canada. Fines are provided for selling goods according to any standard other than those.

### TEUTONS DEVELOPE AERIAL SERVICES

Amsterdam, April 4.—The Cologne Gazette says that an aerial mail service is being established between Vienna and Kiev and also between Odessa and Constantinople.

Tom, Tom, the Spearman's son,  
Stole a Wrigley's and away he  
run!  
Each stick he chewed his health  
renewed  
And helped his appetite for food!  
But his father said "The boy is  
wise,  
I let him do it to advertise!  
Since I quit my piping and bought  
this store  
I'm selling Wrigley's gum galore!"
