"The food crisis is grave and urgent, beyond possibility of exaggeration."—Sir Robert Dorden

# City and Town Labor Must Save The Food Situation

THE heart of the food production problem is labor, and the heart of the labor problem is the city dweller. City people must produce food if Canada is to do her full duty in support of our soldiers and Allies.

Men who are needed on farms must come from the cities and towns—there is no other source. The Provincial Departments of Agriculture co-operating with the Canada Food Board, can place thousands of men on good farms in this Province. They are needed at once.

## Those who remain at home must also Grow Food

A War Garden will not excuse the man whose rightful place this year is on a farm. But War Garden service is needed from those who can do no more.

Every pound of home-grown vegetables, produced on city land by city labor, will be a positive addition to the food supply. Home Garden

and Vacant Lot cultivation will leave the farmers free to grow more food for export.

The vegetable garden offers an opportunity for service to men whose circumstances make it impossible for them to work on a farm, to women, to boys and girls—to city people generally.

## Be a Food Producer This Year

If there is a garden or vacant lot movement in your community, associate yourself with it. If no organization exists, do what you can to interest your neighbours in the War Garden campaign. Write to your Provincial Department of Agriculture for pamphlets on gardening and additional information.
