Grow Your Own Vegetables

CITY people this year must help to grow their own food. Every pound of vegetables that can be produced in home gardens or vacant lots will be a positive addition to the supply of food. Moreover the cultivation of land in city, town and village will leave market gardeners and farmers free to grow wheat and other supplies for export.

It may be that the only contribution which you can make towards relieving the dire food needs of our Allies will be a vegetable garden. If 200,000 families in Canada would cultivate a garden of this kind it would mean a very important aggregate addition to our food supply.

In Montreal vegetables to the value of \$100,000 were grown on vacant lots last year. Calgary had over 1,100 lots under cultivation, covering an area of 200 acres. Splendid results were achieved in other cities.

There is even greater necessity for war gardens this year. Tremendous interest in the movement is reported from all parts of the Dominion. Are you a member of a vacant lot organization? If none exists in your community help to organize one.

Home garden and vacant lot cultivation is really needed and may truly be considered a patriotic service.

Organized Efforts Will Bring Best Results

Decide here and now to have a war garden. Persuade your neighbours to do the same. All the tools necessary are a spade, rake and hoe. The cost of seeds is a trifle. Grow only standard vegetables such as potatoes, beans, peas, beets, carrots, parsnips, onions and lettuce.

By growing your own vegetables you can not only perform a patriotic duty, you can also help to control the high cost of living.

Write to your Provincial Department of Agriculture for pamphlets on gardening and any additional information.
