ABOUT THAT EXTRA TRANSMISSION LINE FROM SHAWATLANS

To the Editor:

On April 20th of this year, the writer had occasion to write to the mayor and council in reference to the part taken by him, as superintendent of utilities, concerning the building of a transmission line to serve the Prince Rupert Lumber Co., the report about town being that I had neglected, either through incompetence or for some other reason, to advise the council that a line was required. The substance of the letter above referred to was that no such line was necessary, the old line having ample capacity to handle the load and in view of the fact that I had been blamed for an error which would cost the city in the neighborhood of \$20,000, I asked the council to look into the matter, suggesting that they refer it to an outside party in the person of Mr. Anderson, consulting engineer of Vancouver, and if it was found that I was correct in my contention, as much official publicity be given this fact as had been given to the statement that I had erred.

No reply to the above mentioned letter having been received up to July 4th, I again addressed the council asking for a reply to my former communication, which letter, as subsequently reported in the papers, was laid over without having been read.

In the meantime, Mr. Anderson, to whom the matter had originally been referred, had visited the city on two different occasions and upon the occasion of his last visit, the writer took it upon himself to ask Mr. Anderson just how the matter of line capacity stood. In reply Mr. Anderson stated, first, that my contention that an additional line was not necessary was perfectly correct; second, that he had never suggested that a line was required only after having been wrongly informed as to the conditions to be met; third, that he had, at a meeting of the council held on July 2nd, so advised the members present and had further informed them that the old line was sufficiently large to handle the city load, the sawmill load and leave a generous surplus to spare.

In my letter to the council of July 4th, I again asked for a denial of the statements which had been made in the early part of the year and which were to the effect that I was responsible for the expenditure of some \$20,000, but to date the council have not even had the courtesy to reply and in view of the fact that I propose making Prince Rupert my home, and in justice to myself and family, I feel that it is only fair that this whole matter be given publicity and that a contradiction of the statements which have been made concerning the part I have had in the matter of the supply of power for the mill should be forthcoming. These statements reflect to no small extent upon my ability as an engineer, my reputation as such and to the engineering firm with which I am now associated in the city.

I would ask, therefore, if I may encroach upon your generosity to the extent of publishing this letter in the columns of your valuable paper, to state the following facts which facts have already been put up to the council.

First—That the writer was perfectly correct in not advising the building of a line which was entirely unnecessary to serve the mill and the building of which would entail the needless expenditure of approximately \$20,000 of the people's money.

Second—That if given proper data Mr. Anderson or any other engineer would have no difficulty in substantiating this.

Third—Notwithstanding that

assurances were given that a line was not required, the work was undertaken and although now stopped with the line still incomplete, an absolutely unnecessary expense of the above mentioned amount has now been incurred.

I am attaching herewith copies of the letters which were sent to the council, as I feel it a duty that I owe to the people of Prince Rupert to acquaint them with the full facts.

Yours very truly,
D. R. KENNEDY.
