

Two Questions

With so many low-priced so-called anti-skids obtainable, would that great host of motorists pay more for Dunlop "Traction" Tread if they could get its merits elsewhere?

Also, would that other large list of car owners buy "SPECIAL" if tires which somewhat resemble it in appearance resembled it in efficiency?

FROSTS INJURE PRAIRIE CROPS IN THE NORTH

Both Wheat and Oats Will Be Light, But Late Rains Improve Grass.

EXTENT OF DAMAGE NOT YET FULLY KNOWN

Conditions in the West have improved in so far as supplies of grass and hay feed are concerned, but evidence continues to pour in as to the damage done by the frosts, says a recent crop report. It is still impossible to state the extent of the damage, but in a number of sections in Northern Alberta the crop is already being plowed up, the farmers figuring that it is no use leaving it, as it is too late in the season for it to come back, even for feed. While the hay situation has been improved by the rain, the oat situation has been materially impaired by the frosts so the feed supply of coarse grains may be short.
While all the reports have not been made public, the Deputy Minister of Agriculture of Saskatchewan, Hedley Auld, made a public statement that the damage to crops in the northern sections is very grave indeed, and these are the very areas where the crops promised the best. Much of the wheat has been caught in the blossom stages. There has been no frost of a similar character since 1888 and even in that year the frost came ten days later.

That year no statistics of crop were kept by the Provincial Government of Manitoba because there was not bread and seed in the province. This year Manitoba has suffered the least so far, and there are sections in all the provinces where the crops are still excellent and untouched and it is felt that there is no question of there being bread and seed, but there is some question as to the amount for export to the Allies. While no one wants to preach blue ruin, it is felt by public officials generally that the truth should be known in order that citizens may govern their use of wheat accordingly.

SPACE GRABBERS

Among ministers are to be found a few who strive for newspaper notices, "space-grabbers," who attack anything and everything with destructive, not constructive criticism, obtaining notoriety as long as they can continue to be spectacular. Some of the veterans want the soldiers' publications to pursue just the same course, blind to the fact that the end is bound to be speedy oblivion, whereas sane constructive criticism wins a paper the respect necessary if it is to wield telling influence. The preacher or paper that degenerates into a chronic knocker soon forgets that there is good as well as evil in the world, and neither of them are then fitted to fill their purpose as leaders of public thought.—B. C. Veterans' Weekly.
