

SHAVING EASIER

(Continued from Page 1)

during which he worked out the plan and finally perfected the model for the Gillette safety razor. The device eventually made him a wealthy man and his face one of the best known in the world, for his likeness was printed on the wrapper of every Gillette blade, the sales of which mounted to more than 1,000,000,000 a year.

Slow to Take Hold

Like many inventions, the safety razor was slow gaining popularity. It was first placed on sale in 1903 and during that year 51 razors and 14 dozen of blades were disposed of. The next year these figures increased to 90,000 razors and 100,000 dozens of blades. In 1926 the company sold 15,000,000 razors and more than 50,000,000 packages of blades, in all parts of the world.

Mr. Gillette was born at Fond du Lac, Wis., January 5, 1855. His father, George Wolcott Gillette, was a descendant of the first governor of Massachusetts and an inventor. His mother, Fanny Lamira Camp Gillette was the author of the "White House Cook Book," one of the most popular volumes of its kind.

The son was educated in Chicago, to which city his parents moved when he was five years old. After working for a hardware company in Chicago two years, Mr. Gillette became a travelling salesman. He was sent to England by one company to establish a branch of the business and upon returning to the United States joined the sales force of a bottle stopper company.

In 1901 he was placed in charge of the latter company's London office, but remained abroad only three years when he resigned. By that time he had perfected the idea of his safety razor and returned to America to devote all his time to it.

Father E. M. Leray, O.M.I. of Stewart left on yesterday afternoon's train for a trip to Edmonton. He will return in the course of the next few weeks via Vancouver.

It is generally believed that only one of Christ's apostles, John, escaped martyrdom.

EASY TO TAKE

Twenty Years Ago

In Prince Rupert

July 11, 1912

Land sports and water sports were featured this year in the most ambitious Dominion Day celebration ever staged in the history of Prince Rupert. Generous prizes were offered.

The steamer Prince Rupert had three honeymoon couples on board on her arrival from Vancouver. They were Mr. and Mrs. A. G. Forster, Mr. and Mrs. H. B. Cambie and Mr. and Mrs. George Little.

Norman Griffiths, M.P., states following a recent visit to British Columbia, that the mineral wealth of the northern part of the province is as yet untouched and the greatest known coalfield lies dormant in the Ground Hog country.

PRINCE GEORGE

The board of school trustees has decided not to re-engage C. A. Scott, principal of the high school, Mrs. L. Dixon of the high school teaching staff and Miss E. Milligan of Connaught public school. Miss Milligan has been engaged in teaching in Prince George for approximately twenty years.

The Dominion Day celebration here included a full program of aquatic events such as swimming races, diving contests and motor-boat sprints. There were also field sports and football game between McBride and Prince George.

Pioneer Knight Of Key Subject Of Biography

S. G. Lawrence, genial telegraph operator at Stewart and the town's consistent booster, was a visitor to Vancouver early last month for the first time in more than a decade, says a biographical sketch in the magazine section of the Vancouver Province. He has watched Stewart boom, run through a depression and boom again, and he is sure that she will be on top of the world again when prices of silver and lead improve.

Four years ago there were forty-six mining companies operating in Stewart district. Now the number of profitable mining operations there is down.

Mr. Lawrence visions a splendid future for Stewart as an outlet to a huge country east and north of Portland Canal. He wants the government to put in a road from Stewart to the Northern Cassiar. Cassiar district itself covers almost one-third of British Columbia and is full of mining properties which could be extremely profitable if an outlet could be secured for their output.

Anglican Rector At Quesnel Was Inducted Lately

QUESNEL, July 12.—A large congregation witnessed an impressive ceremony here recently when Rt. Rev. Walter R. Adams, Bishop of Cariboo, inducted Rev. E. G. Munn as rector of the Anglican Churches here and at Barkerville. The Bishop was attended by Rev. Rural Dean S. Pollinger, who preached the sermon, and by Rev. T. V. L'Estrange of Prince George and Rev. E. M. Cooke of England.

Fine Big Los Angeles Yacht Is Caller Here

With its owner, W. Hole, and party on board, the 120-foot diesel-powered steel yacht Samona II, one of the largest and most handsome craft of her kind to be seen here in some time, spent a few hours in port this morning on her way back to Los Angeles following a cruise of Alaska waters.

The vessel moored during her stay off Royal Canadian Naval Volunteer Reserve headquarters.

Unemployed Ass'n Branch Organized At Stewart Town

STEWART, July 12 — A local branch of the National Unemployed Workers' Association has been formed here. Charles Lake is chairman, Ted Morrice secretary while members of the executive committee are Joe Grace, Gordon Smith and S. McLean.

DIES IN ST. JOHN

(Continued from Page 1)

For many years the late Chief Justice McKeown was a member of the board of regents of Mount Allison University, later becoming president of the St. John Branch Alumni Association of the University. He was president of the St. John Anti-Tuberculosis Association in 1910.

In 1901 deceased married Edith A. Perkins, who died a month after the wedding. In 1905 he married Agnes Grace Burpee of St. John who survives him.

The late Chief Justice McKeown visited Prince Rupert a few years ago in his capacity as chairman of the board of railway commissioners.

DR. J. H. CARSON WILL TAKE POST-GRADUATE COURSE

Dr. J. H. Carson is leaving this week for Lakelse Lake where he will spend a month, after which he intends to proceed to Vienna to take up post-graduate work in eye, ear, nose and throat work, returning here to practice later. Mrs. Carson and family will reside at the Waldron Apartments during his absence.

MUSSALLEM CARRIES ON

Arrangements Made for Continuation of Grocery Business at Old Stand

Announcement is made by the Mussallem Cash & Carry that it will carry on at the old stand, on Third Avenue, arrangements to that effect having been made.

Mr. Mussallem says he hopes to serve his old customers as heretofore. His firm was the one instrumental in bringing down grocery prices and he plans to continue to give his old customers the best possible prices on a cash and carry basis.

His store on Third Avenue has for several years been the Mecca for those who looked for high values at low prices. This policy will be continued and the store will endeavor to do even better than in former days.

The Cash and Carry will handle first-class groceries, fruit and vegetables and will give free delivery to those purchasing to the amount of two dollars or more at one time.

Out-of-town orders will receive his usual prompt attention as he is in a position now to handle these as previously.

GOODBYE BLUE MONDAY — by C.A. Voight

**Millions wash clothes this safe, modern way**

MILLIONS of women all over the country get whiter, brighter clothes—just by soaking them in Rinsol suds. Thick, creamy, active suds—even in hardest water. Twice as much suds, cup for cup, as light-weight, puffed-up soaps give.

Rinsol is safe for your finest cottons and linens—white or colored. Recommended by the makers of 40 famous washing machines. Get the BIG package today.

The hard-water soap for tub, washer and dishpan

A BUDDING ROMANCE ALMOST SHATTERED

HER FIRST DANCE WITH JIM. HOW THRILLED SHE WAS!

BUT AFTER ONE DANCE JIM LEFT HER — DIDN'T COME NEAR HER AGAIN

WHY DON'T MEN LIKE ME? SHE SOBBED THAT NIGHT

FINALLY AMY TOLD HER HOW SHE HAD UNKNOWINGLY OFFENDED

TODAY SHE IS ENGAGED TO JIM. SHE BEGAN USING LIFEBOUY — ENDED "B.O." FOREVER

**Why take chances with "B.O."?**

PORES are constantly giving off odour-causing waste—a quart daily. We don't notice this odour in ourselves, but others do!

Play safe. Always wash and bathe with Lifebovy. Its creamy, abundant, searching lather purifies and deodorizes pores—ends all "B.O." danger. Its pleasant, extra-clean scent that vanishes as you rinse, tells you you're safe.

**Complexion Secret**

Lifebovy's gentle lather frees pores of clogged impurities—makes dull skins glow with new radiant health. Adopt Lifebovy today.

QUEEN CHARLOTTE ISLANDS

(Prepared by a Resident of Long Standing)

The Queen Charlotte Islands have the last and only great stand of Sitka Spruce in the world.

The Queen Charlotte Islands have the largest stand of Cypress or yellow cedar in the world. This timber for railroad ties will outlast treated or creosoted ties as three to one. There are millions of yellow cedar poles on the Islands and it is believed by many that a very high grade of turpentine can be extracted from the trees; also oil for mining and flotation purposes.

Queen Charlotte Islands have very large red cedar timber stands. When recently examined by Japanese experts it was pronounced to be the toughest and best in the world. Large quantities of this timber are suited for piling, which when treated with creosote will outlast fir four to one. There are millions of feet of alder on the Islands for which there is said to be a ready market in Japan.

Queen Charlotte Islands have over 100 miles of gold-bearing sand on the east and north coast beaches.

Extensive copper deposits and gold-bearing quartz are known to exist. Also antimony, iron and other ore showings have attracted considerable attention.

For many years oil prospectors have been attracted by oil seepages at various points. There are extensive oil shale beds and evidences of natural gas. Coal is known to underlie a considerable part of the country.

SPORTSMAN'S PARADISE

The Islands are a sportsman's paradise. Black bear are numerous, and there are also plenty of deer, wild cattle, ducks, geese, pheasants and quail. King salmon can be caught with a trolling hook.

Pink salmon abound in countless numbers and Chums run up the creeks in the proper season.

The Islands have fine razor clams and scallop clams, said to be the only extensive beds in the British Empire. The scallop, a rival to the oyster, has not yet been introduced to the world's markets. They are found in the neighborhood of Naden Harbor, Rose Spit, Tow Hill and Skidegate Inlet.

Crabs abound in the waters adjacent to the mouths of streams on the north and east coast of Graham Island.

Other commercial fish found in the adjacent waters include grey fish, sable, various varieties of flat fish, herring and sardines.

THE CLIMATE

The climate of the Islands is mild and tourists who wish to get out of the beaten paths will find it a wonderful change from usual routes of travel. There is a great field for archeological and natural history studies, for mining ventures, for timber industries, for oil speculation, for sport or just as a place to loaf and enjoy life.
