Ads.

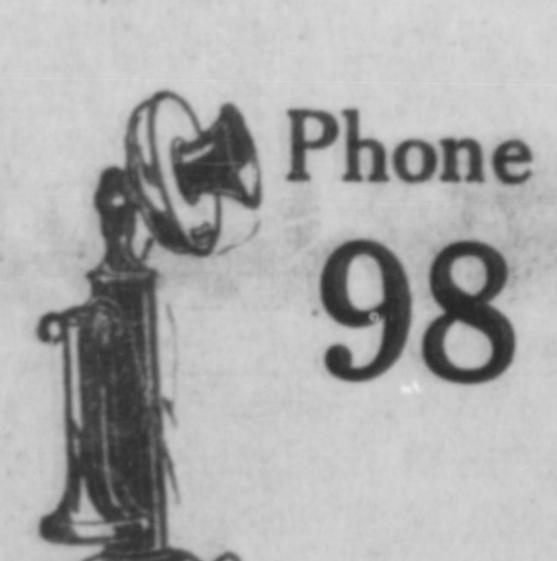

# The Classified Ads.

Many people have something in the house they would like to sell which could be turned into money if they knew of a customer. Try a classified advertisement. Most people read the classifieds. For about fifty cents you can let them know about it and it may prove a profitable transaction.

# Renting the House

There are a number of houses in the city not rented yet and many people make little effort to secure a tenant. Others who are wise to their opoprtunities try a classified advertisement in the "For Rent" column and often get results. As one satisfied customer said recently: "Those little ads certainly do bring results."

# Some Like Reader Ads.

Some people after trying other kinds of advertising decide to try a reader among the locals and personals. Then they have got results. The cost is a little higher but they have been well satisfied. When conditions are like they are today the newspapers can often help. The price is not very high. Do not lie down and bemoan your hard fate. Try a different kind of advertisement and if that is not successful try again.

# WILL PAY EXPENSES

City Council Refuses to Accept Responsibility in Regard to Drowning

Agreeing on compassionate grounds rather than on the basis of any responsibility in the matter to pay actual funeral expenses and cost of medical attention in a limited amount to the mother for conference, who arrived here on local gold prospecting expedition shock entailed by the accident, the the liner Laurentic at the week- into the Liard River country by way city council last night authorized end. the city solicitor to make settlement without prejudice with Mr. and the Free State delegation was go- party going in. Up to this morning, Mrs. Hansen whose 21-month old ing to Ottawa concerned with this route had not been definitely son was drowned recently when he economic questions and it was settled upon although the promofell into a ditch on Alfred Street.

In a letter to the council, the parents of the child, Mr. and Mrs. Ed. Hansen, asked for settlement in the sum of \$250 to cover expenses. They held the city responsible for the fatality in leaving the ditch open.

A report from City Solicitor E. F. Jones held that the city was not ing a distance of some 300 feet anyone who is in doubt. from the home.

sands of places which it was impossible for the city to safeguard Once kept in a pit a babolquhoun; where a child of such tender age might come to grief if allowed to stray, Ald. Pillsbury moved that the matter be referred to the finance To feed your babolyuhoun with a committee with a view to the possibility of the city meeting the actual expenses involved as a result of the accident.

Rudderham.

The amendment was seconded by

bury, Ald. Rudderham and Ald. shares. Black opposed.

Development of Jessie Mine at For the East-Smithers Proceeding Satisfactorily

SMITHERS, July 19:-The tunnel being run on the Jessie Mine, Hudson Bay Mountain, is now in 30 feet from the portal. It makes an oblique cross-cut of the No. 2 vein, a mineralized zone which shows 20 feet in width on the surface. In the tunnel the width is greater and i would appear that the zone is widening as it gains depth.

In the tunnel, mineralization evident throughout the full length of the adit. In this distance two seams of high grade ore have already been intersected, both of which show in the surface workings but both of which are better in the tunnel than on the surface. The zone between these rich bands i mineralized throughout and will make low-grade ore. A third seam of high-grade, the hanging wall band, has not yet been reached in the tunnel. It is the principal band of ore in the No. 2 vein and may be still some ten or fifteen feet ahead of the face of the tunnel. It is the widest and richest of the three bands of good ore shown up on the

surface above the tunnel. The work is proceeding in the tunnel steadily with a day shift and a night shift working to speed the development. At the end of the past week examination was made on the property by W. G. Norrie-Lowenthal of Vancouver, the company's consulting engineer, who came north to Smithers by car.
