

Let Music Brighten the Lives of Your Children

Let them grow up in an atmosphere of good music. Let their appreciation of the beautiful things of life be developed by good music. Let them receive the indelible imprint of culture and refinement through the medium of good music. While the young minds are open to receive such impressions, begin their musical, and higher, education with

The NEW EDISON

"The Phonograph with a Soul"

This wonderful instrument brings the world of music into your home; re-created by the world's greatest artists. No matter where you live, your children can have the same musical advantages as though living in the great cities during the height of the musical season. The New Edison does not merely imitate. It re-creates. No human ear can distinguish artist from phonograph. The famous Edison tone tests have proved this, not once, but more than 1500 times. Start the Children's musical education to-day, by bringing them here, and letting us play a program of charming music that will be as enjoyable for you as it will be delightful for the little ones.

LOOKING FOR SIR D. MANN TO COMMENCE

Railway at Stewart Should Be in Operation Directly the War Is Over.

R. K. NEILL SECURING OUTFIT FOR SHIPPING

Splendid Showing of Properties in The Valley Warrants Greater Consideration.

WHARF IS NECESSARY TO CONDUCT OF THE WORK

Stewart, Nov. 22.—People here are on edge wondering when Sir Donald Mann is to start to open up his properties. He has some very highly mineralized claims here, probably the best that can be found, and he promised that as soon as the war was over he would commence to open them up and operate the railway which was built some years ago. Although he was offered a good price for his rails, much more than he gave for them, he refused to sell and now everything is ready once some little repair work has been done, to commence operations.

Securing Outfit.
R. K. Neill, who is manager and chief proprietor of the Bush mine

100%

That is the proportion of medicine contained in Zam-Buk, and that is why Zam-Buk's healing powers are so superior to ordinary ointments, which contain about 5 per cent. medicine and the balance animal fat. Zam-Buk contains absolutely no animal fat or harsh mineral drugs, but is composed exclusively of extracts of medicinal plants and herbs and vegetable oils. These are so blended, refined and concentrated that they contain the maximum amount of soothing, antiseptic and healing power. In addition to this, Zam-Buk has marvellous powers of penetration. It thus reaches and destroys all germs in the underlying tissues, leaving no trace of disease to break out again. Zam-Buk is best for all skin diseases, ulcers, blood-poisoning, and piles. All dealers, 50c. box.

is out securing horses and outfit with which to haul the ore from his mine to the wharf. He is expected to arrive back soon and bring the stuff with him and then the activity will commence.

The Provincial Government, it is understood, has spent about \$7,500 in helping to build the road from the Bush property to tide-water, but the Dominion Government has not done its part by providing a wharf. This may be rectified in the spring, but in the meantime the place is badly handicapped.

Some development work has been going on all summer at the George Copper Mine up the Bear River above the Redcliffe property. This ore will have to be shipped over the railway, however, and until it is in operation no large amount of work can be done.

Copper Showing.
Across the valley from the George mine is the Red Top group. There is a big copper showing but little work has been done on it so far. It is altogether probable, however, that this property may prove very valuable and it will add to the shipping capabilities of the district. There is a galena prospect above the copper which has not yet been developed.

Antimonial Lead.
Jimmie Nesbett and Andy Archie, two old prospectors who are well known in the district, have an antimonial lead property at Glacier Creek above the Portland Canal mine. This is a part of the Ruth-Francis group. It has a six-foot face of solid ore.

At the Lakeview group the Granby people ran a tunnel but with no results. The general opinion seems to be however that there is yet plenty of ore there if it is developed. Another property owned by

Nesbett and Archie that some day will be investigated is the Prince John just above Stewart on the Bear River. There is a very promising showing of low-grade copper ore and it is close to transportation. The owners have a crosscut tunnel running 100 feet.

Molybdenum.
There is a fair showing of molybdenum on a property just across from Stewart townsite on the opposite bank of Bear River. This might develop into a mine.

In view of the showings made by these properties and the prospects of great development work now that the war is over it seems queer that the Government should delay over the little matter of repairing the dock which at present is quite useless.

COMPANIES ADOPT SIMPLE BOOKKEEPING

(Special via C. T. P. Telegraphs.)
Washington, Nov. 22.—Packing companies, whose sales exceed \$100,000,000 a year, have agreed to adopt the new simplified system of bookkeeping, so that the Food Administration can keep a closer supervision of the profits.

Such supervision continues under the Federal Trade Commission despite the signing of the armistice and the consequent relief in the food situation. Changes do not affect the percentage of profit packers are permitted to make upon food.

Fancy goods and cut glass at Tite's Xmas discount prices. tf

CARD OF THANKS

Mr. and Mrs. S. H. Pearce and family desire to convey to their many friends and those of their son, their thanks for the many kindly expressions of sympathy they have received on the death of their son Bert.

They wish also to thank the members of the Great War Veterans for their kindly interest and activity on the occasion of his funeral.

BANK OF MONTREAL

THE Bank of Montreal announces that dating from Saturday, October 12th, the offices of the Bank of British North America will be operated as Branches of the Bank of Montreal.

To the customers of that Bank we extend a cordial invitation to continue their accounts with us and an assurance that their business, whether it be large or small, will receive our best care and attention.

FREDERICK WILLIAMS-TAYLOR,
General Manager.

It's rubbing soap on Blankets that shrinks and stiffens them

—And using ordinary soap to wash them

That was the old way of washing, and it was ruinous for woollens.

Wool fibre consists of tiny overlapping scales like the scales of a fish. When you rub or twist woollens, when you use ordinary soaps containing alkali or other strong cleansing agents, these tiny scales shrink and interlock, and your woollens become stiff, matted and shrunken.

With Lux there's no rubbing. Only sousing in the rich, pure lather, and gently pressing the suds through the soiled parts. Lux comes in delicate flakes, which dissolve instantly in hot water and whisk up into a wonderful lather. Lux is so pure, that it won't shrink even the delicate wool fibres.

Wash your blankets this year the Lux way! Have them like new again. Your grocer or department store has Lux.

How to wash blankets

Use two tablespoonfuls of Lux to a gallon of water. Dissolve in boiling or very hot water. Whisk into a thick lather, then put the blankets in, and stir with a smooth stick. Let them soak till the water has cooled enough for the hands to bear with comfort. Then squeeze the suds through the blankets. Do not rub.

Rinse three times in clear water of the same temperature that you washed the blankets in. Dissolve a little Lux in the last rinsing water, but do not beat into a lather. This leaves the blankets softer and fluffier. Do not twist. Put through a loose wringer, or squeeze the water out. Dry in the shade.
