What About a Co-operative Cold Storage?

There is to be a meeting of fishermen tonight for the purpose of discussing the question of a fishermen's cold storage. The committee which has had the matter in hand has put it up to the fishermen with the idea that they, being the most interested parties, might like to go ahead with the scheme. The city has extended the time of their power privilege in order that they may have every chance.

If the fishermen want an independent cold storage this is their chance. There is a good deal of money needed but doubtless the merchants and others would take stock in the concern. It is necessary, however, that those most interested in the business should undertake the work and when it becomes a going concern they will be the people who will support it. It is useless for the fishermen to grumble at other institutions, at the shortage of ice, or at the conditions generally if they are unprepared to get in and help themselves when the opportunity offers.

Time Now Ripe for Athletic Association.

The invasion of influenza has had the effect of cutting off all the winter activities of a social nature. There had been a proposal to form an athletic association with a view to securing the use of the Agricultural Building for games and sports during the winter months. That was all knocked in the head when the sickness came.

Now there is again some interest being taken in the proposal and the movement is worthy of all support. It is during the winter the institution is needed. Men both young and old become soft and flabby from lack of exercise. A few go for tramps in the woods after deer and for long spins down the track or in other directions. As a rule, however, the people of Prince Rupert do not walk, nor do they take exercise in any other way. They are out of condition and have a tendency to slow down.

With a hall for games and sports, with men's gymnasium classes two or three times a week, even the older men might easily get the exercise which they need. It is true that until after Christmas many of them will be very busy and possibly may not be able to take part. Others would not be affected by the season and could make a start. It would be a most useful institution and there seems to be no good reason why it should not get under way very soon.

Smelter Proposal Not a New One.

The question of erecting a smelter here has been agitated from time to time, but there is nothing like keeping it up. No great improvement has been secured except by being persistent and going after what is wanted with a determination to succeed. That must be the method of securing a smelter here. It must be made very plain that this is the one place on the coast where a smelter can not only be made to pay but be made of general service to the mining districts both of the coast and of the interior.

In an interview with a mining man published yesterday it was set forth clearly that the one logical point for a smelter was Prince Rupert. It was shown that not only would it serve the mines of the north and south coast if built here, but it would also be convenient for the miners of Omineca. A large number of mines in the Hazelton district could ship if the smelter were in a position where there would be but the one handling.

What the mining man failed to state was that on the Queen Charlottes there are a number of producing mines that would add their quota and help to keep a smelter going.

There is a large deposit of low-grade ore controlled by the Granby Company up the Estell River. A good deal of boring has been done and it is said to be an even larger deposit than the one at Hidden Creek. At any rate it is a valuable deposit. Whether the company will ship it to Anyox or erect a smelter right on the Skeena is not certain. If they should put a smelter on the purpose for the other mines of the district. The whole difficulty is one of transportation. Three or four handlings makes shipping with profit impossible. With one handling only many might be able to ship.

AVOID PNEUMONIA

During Convalescing Period.

When convalescing from the Flu a powerful blood-making tonic is an absolute necessity, and one that is accepted by the most delicate stomach should be available.

KENNEDY'S TONIC PORT is the most efficient general tonic and builder of body tissues you can possibly use.

It is a reliable restorative and is enjoyed when other medicines disagree.
