## Caring for Children Is Latest Movement.

The movement has been made that the various governments, both of the Dominion and the province, were always ready to spend money on the improvement or the protection of live stock, but that when it came to improving conditions for bringing up children they considered they had no duty in the matter.

Now there is a general movement in the big cities to bring to the attention of the Government the claims of the children. A Child Welfare Association has been formed and there is to be a convention next week in Vancouver when the Minister of Education, Hon. J. D. McLean, will deliver an address. There will be a number of other interesting speakers and much publicity will be given the affair.

It is curious of how little importance children are considered to be. Even parents grumble at the cost of education or at any steps which are taken to improve the condition of children. The latest moves, however, are to bonus mothers in order that there may be no worries during the critical period when the children are very young; to have supervised playgrounds in every city; to look closer after the ventilation and general conditions of the schools; to look closer to the manner in which children are fed and clothed by their parents or guardians; to see that children have ample playground space and have every opportunity to indulge in healthy games, and in fact to give all children just as much care as is given to thoroughbred hogs or cattle or horses.

## Full Public Purse Must Back Industry.

The coming year will not justify any relaxation in our efforts to increase the thrift and economy of the nation in order to keep the public purse filled, says the Bank of Commerce monthly letter. Fighting may soon end, but our men will require to "stand to" for an indefinite period until many difficult international problems have been settled, and in the meantime the war-racked and devastated countries of Europe must be supplied with many necessities. In providing these the burden of the financial aid required will fall upon those of the Allies who are able to supply the necessary funds from their own resources.

The industrial welfare of Canada for some time after the cessation of the war will depend largely upon the manner in which individual enterprise is gradually substituted for the government control of business which has prevailed during the war. During this period of transition the Government will be justified in using its credit on a diminishing scale for effecting the change. Employment for those of our people who have done good service in the manufacture of munitions may be provided by new foreign business, which, pending the determination of the important geographical and political questions arising out of the war, will be controlled largely by the allied Governments. Only if they are backed by a full public purse, can our representatives at the allied councils confidently assume the responsibility for a large share of the rehabilitation which is immediately necessary. If the country is to be saved from a period of serious industrial depression, it is of the utmost importance that our people should not relax their efforts to save, so that they may be enabled to give generous financial support to the Government whenever needed. To provide for the cost of demobilizing our expeditionary forces and for our share in restoring the war-devastated areas, additional Government loans will be necessary from time to time, though on a lesser scale than during the war.

## Land Settlement Plan Well Received.

The Provincial Government land policy which has been placed in the hands of the Land Settlement Board under the general supervision of the Minister of Lands, is receiving a great deal of attention in the east following the visit of Mr. Pattullo to Ottawa. The comments on it are generally favorable. It is realized that the situation is a difficult one and that the Government is tackling it with courage. The main thing now to do is to push the work with energy and keep it up without any slackening. Officials that are not making headway with the work, if there are such, must be set aside and make way for capable men. The land must be settled and the legislation which has been passed seems capable of securing the desired end if effect is given to it by the Land Settlement Board. All depends upon them. The people are now looking for results and if the Board is not getting results it will have to be improved.

# A COLD PREVENTIVE.

Have you ever come out of a theatre, or church or over-heated room and felt, immediately the cold night air caught your throat and breathing passages, that you were going to catch cold? That is the time to take Peps. Two or three Peps taken at once will prove an unfailing preventive. A cold developed means needless suffering and expense. Safeguard yourself by always keeping a box of Peps on hand.

They are also best for coughs, sore throat and bronchitis. All dealers, 50c. box.

## AVOID PNEUMONIA

During Convalescing Period.

When convalescing from the flu a powerful blood-making tonic is an absolute necessity, and one that is accepted by the most delicate stomach should be available.

KENNEDY'S TONIC PORT is the most efficient general tonic and builder of body tissue which can possibly be used.

It is a reliable restorative and is enjoyed when other medicines disagree.
