## Hospital Control

## To Be Discussed.

In connection with the resolution, notice of which has been given by Chairman Stewart of the Hospital Board, asking that the city take over the management of the hospital, it may be mentioned that there has been a general feeling throughout the province and especially in the cities that the Provincial Government should assume the responsibility for all hospitals.

Already the Provincial Government makes a considerable grarnt toward the hospitals and in return for that the institutions are supposed to take care of cases from any part of the province. Many people from the outlying districts come to the Prince Rupert Hospital so that it is to some extent a provincial institution.

Whether the Government could be asked to take over the hospitals at a time when they are deeply involved financially is doubtful. The Oliver Government is struggling under a burden of inherited debt and for many years will be unable to undertake many of the duties which should fall to it if it were solvent. Perhaps, while it is recovering, the city might undertake the duty. The question seems to be whether a purely civic body would manage it better than the present board on which the city has representatives and on which the Provincial Government also has its nominees. The whole question will be discussed at the special meeting which has been called for the purpose.

#### Raise Vitality Of Human Unit.

In the report of the Provincial Board of Health which has just come from the press Dr. H. E. Young gives some good advice \* to the people of British Columbia. He says:-

"I think I am safe in saying that we have nothing of great importance along public health lines in the present war up to the present time, but what we have gained is the awakening of a very |\* satisfactory proportion of the people to the importance of healthwork and to its possibilities. Not in a theoretical direction, but |\* as demonstrated by actual accomplishment.

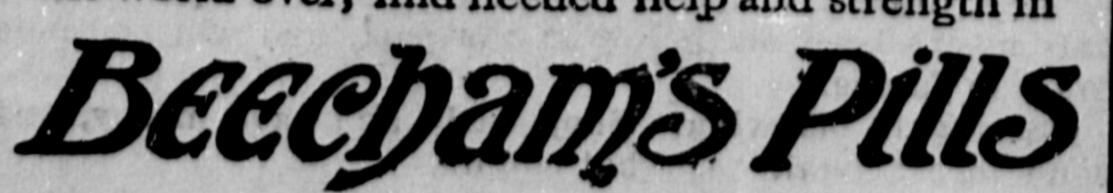

"We must look upon our health-work from a broader outlook. Formerly it was the highest ambition of public-health workers to show each year a diminished morbidity and mortality rate from certain named diseases. If the Public Health Officer Notice of Intention to Apply to Lease Lan could show that in a brief period of his incumbency he had cut DISTRICT; RECORDING DISTRICT the typhoid death-rate down to one-fifth of its former proportions SKEENA AND SITUATE ON SOUTH SHOP and had a steadily diminishing rate for scarlet fever or diptheria, ABOUT ONE MILE FROM ITS MOUTI he felt that he had done a great deal. But within the past few TAKE NOTICE that I, John M. MacMilla years we have had a higher ambition. We have felt that we must man, intends to apply for permission deal with more than the negative side of health, and that it was lease the following described tands: most distinctly within the province of a Health Officer to put forth south shore of Lagoon Inlet, Moresby every effort to raise the vitality of every human unit in his com- land, about one mile from its mouth munity to the highest point of efficiency. He must no longer be chains; thence east 20 chains more or less satisfied with the knowledge that from the result of his efforts a southerly following low water mark to the number of individuals have survived who might have died from point of commencement, containing some preventable disease, but he must also feel that he must lay a foundation for the robust citizens of tomorrow, and so our ideals have advanced, taking in not only the previous field of sanitation, but also that of personal hygiene.

#### Co-Operation With Medical Profession.
