

# What are Peps

Peps provide a new treatment for coughs, colds and lung troubles. They are little tablets made up from fine extracts and medicinal essences. When put into the mouth these medicinal ingredients turn into healing vapors, which are breathed down direct to the lungs, throat and bronchial tubes. The Peps treatment is direct. Swallowing cough mixtures into the stomach, to cure ailments and disorders in throat and lungs, is indirect. Peps are revolutionizing the treatment of colds and their price is within the reach of all. All dealers, 50c. box. Send 1c. stamp for FREE TRIAL PACKAGE.

Located November 16th, 1918. JOHN CHRISTENSEN, Applicant.

## WHEN SHOULD CHILD BEGIN THE STUDY OF DOMESTIC SCIENCE

Question Discussed by School Board Last Night on Initiative of Miss Marcellus.

When should a girl start the study of domestic science and at what stage in his scholastic career should a boy commence manual training? Those were the profound questions which were brought before the Board of School Trustees last night at their regular meeting for solution.

Miss Marcellus took exception to the breaking of the regulations in order to take in pupils from the Junior Third classes, claiming that not only did it break up the work to have them come in at this time of year, but that the pupils were not old enough to study such questions as the method of doing laundry work and housekeeping which was the work set for the first year. She had been teaching sewing instead, but she found the three-hour session much too long for the children to sit at close sewing. She asked for a ruling from the board as to whether the regulations were to be enforced.

### Congestion.

After a long discussion in which Principal Macdonald showed the difficulties which they had to contend with on account of the congestion in the schools. Pupils had to be promoted in order to make room below for the pressure in the junior grades.

Mr. Shockley explained that the tools in his department were not suited to the very young boys. It was a physical impossibility for some of them to use the planes, and they had not received the groundwork in drawing which was necessary before they commenced the work with him.

### The Decision.

On motion of Trustee Shaw it was decided to allow no new classes to start manual training or domestic science this year and to refer the general question to a larger meeting of the board.

## G. H. HUTTON SUCCEEDS DR. J. G. RUTHERFORD

An announcement has just been made of the appointment of Geo. H. Hutton, B. S. A., of Lacombe, as successor to Dr. J. G. Rutherford, C. M. G., as Superintendent of Agriculture and Animal Industry for the Canadian Pacific Railway, with headquarters at Calgary.

Mr. Hutton, who for twelve years has been Superintendent of the Dominion Experimental Station at Lacombe, is well and favorably known among the livestock and agricultural interests of Western Canada. His work at Lacombe has always been characterized by its practicability and thoroughness and he has succeeded in bringing that farm to front rank.

A complaint was laid by the janitor of the Borden St. school through one of the teachers regarding the quality of coal being used there. It was a new coal and was more difficult to fire than the coal they had been used to, and there was a dearth of lumps in it.

### 40 HOUR WEEK.

Toronto, Feb. 13. — Trades unions here will ask for a forty hour week and 25 per cent increase in wages.

## Attention to Salmon Trollers

The finest and most economical engine on the market today is the

## Doman Engine for Trolling

Made of the finest materials possible, by a firm who have the whole interest of the fisherman at heart, it is an Engine hard to beat.

Made in all sizes, from 5-7 H.P. to 85 H.P., the Doman engine has been put on the market specially for fishing boats. It burns distillate as well as gasoline, and a mechanical turn of mind is not necessary to run a "DOMAN" fishing boat engine.

For heavy duty, the "N. & S." engine with reversible propeller is the best.
