A Few Reasons Why I have Faith in Prince Rupert

By H. F. Pullen

(Continued from Page One.)

power going to waste and where the supply of logs is illimitable. Wood products then will be among the exports from this port. Already there is one of the finest and largest mills on the coast located right in the heart of the city, another at Georgetown and others up the river and on the islands. There is a great future for this business.

Metaliferous Mines All Around City.

Of the mines it is difficult to speak without having one's word doubted. The mine and smelter at Anyox and the few shipping mines of the district are but the first fruits of the riches that will come. Stewart district alone, where the Bush mine has just commenced to ship some of the richest ore that has ever gone from here, will yield immense wealth of silver, gold and copper. The Alice Arm district, of which the Dolly Varden mine is the best known, will be productive of an immense wealth of ore. Near the mouth of the Skeena River there are mountains of copper ore that will be sufficient themselves to keep a smelter going, and they are but a few miles away. Farther up the Skeena Valley there are properties being found that will all add to the industrial wealth of the district, and across on the islands there will be plenty of duplications of the rich mine which is shipping concentrates from Surf Inlet.

Coal Fields Will Be Developed Soon.

Probably the greatest export trade, however, will be done in coal. Back from this city and not very far away are the Telkwa coal deposits and the Groundhog coal fields. So far as they have been explored and tested they have been shown to be of immense value. When they have been opened up the coal will be shipped this way and carried to all parts of the world. Prince Rupert will become a second Cardiff or Newcastle and ships will come here because they can get the one essential—fuel.

Manufactures Will Follow Population.

There is yet one more source of wealth for Prince Rupert. That is to be obtained from the development of local manufacturing industries. Not only will there be woodworking plants, shipbuilding plants, plants for building the fishing boats which are needed here and for manufacturing material needed in those lines of business, but there are bound to be other industries start up just as they do in every other centre of population. As the city grows people will locate here just because there are people here. Already the city is growing. This growth should continue with steadily accelerated speed until within a very few years fifteen and twenty thousand people and then twenty-five and thirty thousand will be reached.

Harbor Open All Year Round.

The fact that there is an open winter here the year through, that the climate is always equable and that the waters are always open for navigation are important factors in the development of the port.

Here then is a message to the world: Prince Rupert is the coming city, the city where there will be big things doing, the centre of Central British Columbia, the shipping port of one of the greatest of the great transcontinental lines, the fishing, woodworking, mining, and manufacturing centre which is to be. Great things are in store for her.

For Both Comfort and Appearance.

Ladies are very careful of the fit of their dresses. Correct fitting corsets are even more important. Ladies can have these made to measure, of the finest materials, right here in town, fitting each individual figure properly.

Corset comfort is essential to physical well being.

An invitation is extended to ladies to visit

Mrs. Director's Corseterie
