TOO MUCH CAPITAL INVESTED IN MILLS

Lumber Mills of Pacific Coast Have a Capacity More Than Double the Actual Cut

The saw-mills of British Columbia were estimated in 1914 to have an annual capacity of 2,555 million board feet. As the cut for the highest year, 1913, was only 1,157 million feet, the present saw-mill capacity of the province is more than double the amount of the actual cut. A similar situation prevails south of the international boundary, so far as the excess of mill capacity over annual cut is concerned.

For the year 1914, the mills of the United States, including Northern Idaho, Eastern Washington and Eastern Oregon, had an estimated annual capacity of more than 13.6 billion feet, while the annual cut is only 6.8 billion feet. Thus, half the saws in the region in question must remain idle, for lack of a sufficient market for the product.

This locking up of capital in mills and machinery was due partly to the over-confidence of the lumbermen in the ability of the markets to absorb lumber, and partly to the efforts of the millmen to realize quickly on their timber investments. In many cases, these efforts were forced by the pressure of economic conditions. — From "Forest Resources of British Columbia," shortly to be published by the Commission of Conservation.

TRYING TO MAKE LIQUOR RESPECTABLE

(Special via G. T. P. Telegraphs.)
London, March 27.—A bill has been introduced into the House of Lords with the object of converting public bar-rooms into social halls. The author of the measure, Lord Lamington, proposes to transform a saloon into a house of refreshment and recreation where music and dancing might be permitted and children allowed to be present with their parents. Brewers are giving the bill their support.
"It is calculated," commented an official of the Brewers' Society, "to alleviate the tone of public houses. I think the general view of the trade will be that it is a step in the right direction."

We Know Where the Milk Goes

We used to wonder where all the milk we put up was going. The personal house-to-house investigations have shown us. We find that dozens of homes buy it by the case—and use no other milk at all. Others buy a dozen tins at a time. Many homes use it for cooking, and get fresh milk only for the children. Have you tried it yet?
