Nothing Radical About a Soviet.

There is nothing radical about the soviet form of government. It is much the same as ours. It may be conducted on radical principles or on conservative principles. A series of councils or parliaments is all it is. All depends on the view point of those who are in control of the soviets. Any form of democratic government is good if those in charge have enough commonsense to pass proper laws and then put them in force.

According to the press reports Saturday, the Budapest Soviet was not radical enough for some of the people of that city, so they started a rival under more radical control. Practically everything depends upon who is in control. The fact that it was a soviet did not of itself make it a radical soviet.

Supposing a soviet were started in Prince Rupert and an election took place, who would be its chairman or president? Just the same men who are head of the city council. Just now it would be McClymont, for the people chose him by a large majority vote. Possibly the workmen think it would be a member of the Trades and Labor Council. That does not follow. In Russia the head of the soviet is the son of a nobleman. He is not drawn from what is usually known as the ranks of labor.

If labor was united it could pass any laws it wished under our present constitution. There would be no need of a violent revolution. The difficulty is that laboring men are as much divided in their views as are those who do not labor. They may for a time agree, but there is no such thing as permanent agreement among a large number of people, no matter who they may be.

Commissioner For Board of Trade.

Mr. Mortimer has resigned the position of commissioner of the local Board of Trade. He has carried the institution through a dull time and deserves much credit for having done so. Since he has dropped out it remains for the Board to appoint another in his place.

As so much depends upon the commissioner of the Board, the appointment should be made without any considerations of favor. The great thing is to have a live man if possible at the job. It is difficult to find that kind of man, but he is valuable when found. It is better to wait a few days rather than rush in and get a poor man.

Better Deal For Prospectors.

There is a general opinion here that there should be a better deal for the prospector in this province. He is the man who risks everything. He gambles with his time and often comes out the loser. Anything that can encourage him to continue and to follow up the work of developing the property after he has found it is of benefit to the country as a whole.

There is a proposal that an assay office should be established here in order to facilitate mining in this district. That would be a great aid to the prospector. Expert advice can be obtained from Mr. Clothier who has a fine comparative collection of minerals in his office. That is not so good as an assay office, however.

As this is the most central point for mining in the province, it would seem that this is the first place to be given consideration in this regard.

Gives Better Results Than Milk Why should you feed milk to your calves—when you can sell that milk, gaining better results by feeding— BLATCHFORD'S Calf Meal. Containing a wider range of proper nutriment, which is one of the secrets of successful calf raising, it surpasses any other food on the market. As the final results in money earned from your cattle depends upon the bringing up of the calf, it is of vital interest to you to inquire into this calf food.

For That Non-Paying Cow Maybe just one cow in your herd, though eating as much as the others, only produces a few quarts of milk a day. There's a remedy for this in— PRATT'S Stock Food. With a little attention in feeding, you can usually turn her into a profit-paying cow. PRATT'S STOCK FOOD assists Nature in aiding digestion and increasing the flow of milk. Begin feeding that poor milker, today. It means the difference between profit and loss.
