Seamless Wedding Rings

There's a difference in wedding rings. Some are rolled out in strips and joined after bending.

Some are cast in a mould, which may leave the gold porous.

Our rings are hammered from one solid piece by a patented machine which produces a perfect ring without a seam and of a hard, even texture which will keep its polish and will not wear away quickly.

From now on all our wedding rings will be made this way. They cost no more than the others.

Good rings usually run from \$6.00 to \$10.00, according to weight.

The Value of Good Glasses

GLASSES have a value only so far as they represent the skill of your optician.

THE all important thing is that they correct and overcome the defects that cause visual trouble and discomfort. Nothing else will satisfy. No other standard is high enough.

MEASURE the worth of your glasses by what they do—not by what they are.

WHEN we make glasses, it is after a deliberate and careful examination, estimating accurately the amount of the defect, and grinding the lenses to cancel and eliminate it.
