#### Ontario Housing Book Interesting.

The Ontario Housing Committee has issued a report which is printed as a Government bluebook. It takes up the whole question of housing and gives a number of more or less useful plans. The difficulty with most of the plans is that they are ugly. The artistic seems to have been sacrificed in favor of the useful.

On the Pacific coast most of the cottages and bungalows are very pretty. They may not be economical but they answer the purpose well and they create a good impression in anyone coming into the city for the first time. That is particularly true in the city of Victoria and the suburbs of Vancouver.

Anyone interested in housing might gain a good deal of information from the publication just issued and a copy of it may be seen at The News office by anyone interested.

#### Difference Between Bolshevik and Man.

What is the difference between a Bolshevik and a man? The difference is purely one of point of view. These two species of the human race stand on a different elevation. One sees the whole countryside and the other only a part of it. One is educated and the other is ignorant.

Many people who are not Bolsheviks also have a limited outlook. They see about as far as a man looking into a mirror. They are self-centred and a self-centred person is always an ignorant person. Many of these dwarfs look on a Bolshevik as useful material for bayonet practice, or as a target for a rifle, and yet the Bolshevik is several leagues in advance on the march of progress along the road which leads to something better. Possibly as a factor in the general uplift of the masses we shall eventually find that the Bolshevik is one of the most powerful that has yet been felt.

#### Log Destruction Is Great Waste.

The destruction of logs of great value by teredoes is something that might have been prevented. When the logging and mill work closed down in the autumn an effort was made to store some of the logs in safe places. Some of them, however, were left in the salt water and these are the ones that have been injured by teredoes.

The teredo does not live in fresh water, neither will it live in a log that is out of the water part of the time. For that reason the logs are usually stored at the mouth of a stream or on mud flats where the tide leaves them stranded a good deal of the time. That this was not done in this case is the fault of somebody. Had the work been in charge of a commercial institution it would have been looked after, but being for the Government nobody cared. That is the reason Government ownership is a failure.
