Hungerford, New C. N. R. Libby Holman Surrenders on Indictment Charging Her With Smith Reynolds' Murder

> 9:-Libby Holman, "Torch Sing- + tire cabinet of the Nanking er" wife of Smith Reynolds, heir of the Reynolds tobacco millions, who was murdered at his home here on July 5 during a liquor party, surrendered to the authorities yesterday on an indictment charging her with the murder. The charge had been reduced from one of first to second degree murder and the girl was almost immediately released on \$25,000 bail. If the authorities choose and further evidence justifies, the charge may be later increased to first degree murder.

Miss Holman's father, prominent Cincinnati attorney, who is acting as her sole counsel, announced that his daughter would be kept in strict seclusion pending the trial which will take place, it is expected, in October.

RADIUM IS ABUNDANT

Railway Engineer Says Canada To Lead In Production of Metal

CALGARY, Aug. 9-"Almost too good to be true," is the way J. C. MacNabb, engineer of construction Canadian Pacific Railways, describes prospects in the Great Bear Lake mineral fields, following an inspection tour.

Mr. MacNabb firmly believes in the enormous potential wealth of the district, which, he declared. will some day place Canada in the forefront of the world as a radium producer. Silver, copper and other valuable minerals abound there, too.

The new reduction plant, established by the Dominion Department of Mines in Ottawa, has completed several extractions of radium from the Great Bear pitchblende with "almost fantastic results," he continued. From 97 to 98 percent of the radium has been extracted from the ore in each

Plant in Ottawa

"The plant was placed in Ottawa rather than at Great Bear Lake because three tons of acid to one ton of ore are used in the reduction process," he said. "Thus it is cheaper to ship out ore than to ship the acid to Great Bear owing to prevailing transportation difficulties and high freight rates inevitable when supplies must be carried by airplane or portaged for many miles overland.

"I believe the Ottawa plant will become one of the leading units of its kind in the world. It is the only one of its kind in the British Empire at present and obviates the necessity of shipping the ore to Belgium or Czecho-Slovakia for reduction."

Mr. MacNabb pointed out that the life of the radium salts secured from the Great Bear Lake pitchblende was estimated at 250 years while the Belgian product was effective for only 20 years. It was to be hoped, he concluded, that in the near future Canada would be able to break away from the Belgium combine with beneficial results for all mankind

CABINET IS CLEAR

Premier Ekman Only One of Swedish Administration Involved With Ivor Krueger

STOCKHOLM, Sweden, Aug. 9:-Following the resignation last week of Premier Karl Gustave Ekman as a result of disclosures of his activities in conjunction with the late Ivor Kreuger, discredited Swedish capitalist, who committed suicide several months ago, the remainder of the Swedish cabinet remains intact, indicating that none other of its members were involved in Kreuger's machinations.

Swedish general elections will take place next month.
