Flower Gardens and Cultivation of Art.

There are some beds of bulbs in bloom here just now that are just as fine in every respect as any grown in other parts of the world. They are a trifle later than those at Vancouver or Victoria, but otherwise there is little difference.

Anyone wishing to plant a flower garden will find it is not yet too late. Most of the plants should be set out about June 1 in order to get the best results. All the ordinary flowers that are found in the gardens to the south bloom equally well here, with the exception of those which require a very dry climate.

The mossy soil that is found in the gardens here is suitable for flowers if it is well cultivated and manured.

The man or woman who plants a garden and cultivates it is not only getting much enjoyment, but is engaged in public spirited work that is of great value to the community. It develops the artistic taste and cultivates a love for the beautiful and is one of the best methods of preventing slums.

Shipbuilding Already Creates Payroll.

Already the preparations for the shipbuilding has created a payroll in this city of 250 in addition to those engaged in erecting houses and stores. This is giving a healthy impetus to business and as the work progresses the number employed will increase.

This increase in the number of employees at the yards, the employment of a large number of men at the sawmill, and the increase in the halibut fishing all spells better business for the city. It means progress.

Rule of Road to Be Changed Next Year.

A year from now it is proposed to change the rule of the road to make it conform to the states to the south. For many years this has been talked of but it was not until the last session of the Legislature that it was decided to make the change next year. The chief difficulty in the way has been the B. C. Electric Railway.

The officials of the road recently waited on the Provincial Government and suggested that even yet the time was short for them to make the necessary change to their plan to conform with the requirements of the law. This would cost them a large sum, variously estimated from half a million dollars upwards. While the suggestion does not seem to have been made directly the idea seems to have been conveyed that the Government should pay at least part of this amount.

We do not propose to discuss who shall pay for the alterations, but we do think that there should no longer be delay in changing from the present system in view of the fact that there is so much travel across the boundary line both ways. It is necessary for safety and convenience to have only one rule of the road on the continent and the convenience of the corporation should not be allowed to stand in the way of the change, especially in view of the long notice which has already been given.
