FFORT TO FORCE HUNS FROM OSTEND; COAST POSITION ISOLATED

RMANS FORCED TO RETIRE ON WIDE FRONT ON BOTH SIDES OF LA BASSEE CANAL IN BELGIUM

will Find Himself Trapped Unless He Beats Speedy Retreat; tonnage of merchant vessels com-British Monitors Co-Operate with Troops by Bombarding Coast.

October 3.- Magnificent news from the western is that the Germans are retiring on a wide front north and of Labassee Canal. This section of their line lies just north is, between that town, now in Allied possession, and Arers. The retrograde movement is the logical outcome of vance of the British and Belgian forces east of Ypres and the Lys Valley. That, and the extension of the Allied lines . nbrai, has had the effect of placing the Lens-Armentiers at the point of a salient in which the Germans will find elves trapped, as they were in the St. Mihiel salient by the cans, unless they beat a speedy retreat.

rther north the British and Belgian troops have maintained rogress and have captured several more towns. Roulers is MAN WHO SHOT ntarily expected to be occupied by the Allies. Their line ady beyond the Roulers-Menin road and they are encircling itself. The depth of the advance east of Ypres is already practically to isolate the Beigian coast positions from the der of the German front.

tish monitors are heavily bombarding the district from the a very slight further advance will confpel the retreat bi rmans from Ostend.
