THE BYLAWS.

Editor Daily News:

With your permission I wish to reply to Alderman Dybhavn's communication appearing in Saturday's paper re bylaws and agreements.

Money Bylaws.

The city cannot afford to borrow money at the present rates of interest, discounts and exchange. The present taxes which the property-owners pay is ample to provide for all urgent improvements this year. I understand the council has financed Section 2 School out of the revenues and provided about $60,000 for surfacing streets in Section 1. If this Section 2 School bylaw is endorsed the property holders will pay a second time for the school and possibly another 25 per cent discount commission and exchange not to mention interest etc.

Ratepayers vote these bylaws down it is the only way to protect yourselves. Councils of late years in Prince Rupert have adopted the policy of levying almost as high a rate as the municipal act will allow. Property owners are helpless to this extent, but they have full control over money bylaws.

Water Agreement.

Why has the city council not obtained a report from a competent outside engineer on the project? The city has expended close to $500,000 on this water system. It is capable of supplying a population of 60,000 inhabitants and ordinary industries for same; also to supply 2,500 K.W. H. P. Electric energy without the aid of any pumps. Now we are asked to endorse an agreement which will necessitate the installation of a pump to keep our reservoir full. Also the statements that they will only take water that the city does not use. If it was not for the seriousness of the question, the attempt to mislead would be amusing. The fact is if the agreement is endorsed and the mill in operation the city gravity water system will almost be out of operation during the time the mill will be running. The city after an expenditure of half a million will have a temporary service subject to the peculiarities of a pump which the company reserves the right to have 10 days notice to put in repair. If a bona fide company wanted the water which the city did not use, the only place to take it would be from our reservoir, the city and its mains would be protected and the company would get every gallon which was coming to it, but to allow our main to be tapped as proposed between our reservoir and our water supply is, I consider, most unpermissable.

We all would like to see a pulp industry established here but we must always remember there are two sides to a bargain.

W. H. MONTGOMERY.

(The city secured competent outside authority to advise them in regard to the water supply as well as the local engineers. There is practical agreement that 950 gallons a minute is the extent of the local supply and the city is using practically all. The only way to increase the supply is by putting in booster pumps or additional mains. The booster pump method is proposed. If the pump stops the mill stops and the city still has its gravity supply as at present. —Editor.)

INDIANS SIGN UP GOVERNMENT TREATY

Small Cash Payments Made Annually to Mackenzie River Natives.

EDMONTON, Sept. 19.—The Dominion Government treaty party has returned from the north after signing up with nearly 3,000 Indians for the payment of a yearly sum of money and giving them other privileges in return for a release of all Indian lands. All the Indians signed except a few who were away on hunting expeditions and who will have an opportunity to get the treaty money next year.

The amount paid by the Dominion is $7 to each Indian and annual life payments of $5. Half breeds get $240 down. In addition to the dole, there is a certain amount of food supplied for the sick and destitute as well as ammunition and fishing tackle.
