SCHOOL TEACHERS  
AND EMPLOYERS

VICTORIA, Aug. 22.—As a result of a difference of opinion between the school teachers of Saanich municipality and the board of school trustees it is announced that provision is likely to be made in the School Act for arbitration of such disputes so that there will be no danger of teachers going on strike.

In different parts of the province and in other provinces there have been teachers' strikes following the formation of the Federation with Harry Charlesworth as permanent head. The troubles are having a bad effect on the pupils and do not make for efficiency in the schools. The result is that the Council of Public Instruction will be forced to take the matter up and provide a means of settling disputes without recourse to overt acts which tend to injure the work done by the schools.

RADIUM REACHES  
WINNIPEG SAFELYTwelfth of a Gramme to Be Used  
There for Disease Treatment.

WINNIPEG, Aug. 20.—Insured against theft by Lloyds, and in little metal containers not more than an inch long by a sixteenth of an inch in diameter, these again in a leather-covered case, 70 milligrammes of radium has reached Winnipeg for use in the treatment of disease.

It is the largest amount of radium in one place in western Canada, and is worth approximately \$10,000.

It is the property of the Radium Holding company, limited, and it is the intention of the company to increase its holdings as soon as possible to half a gramme of the precious substance, a gramme of which is worth in cash \$120,000, though almost priceless in the interests of science because of the fact that in all the world there are only about 125 grammes of pure radium.

The majority of people know nothing at all about radium. The greatest scientists of the day and age know very little.

But the little that is known has demonstrated the fact that it possesses a power immeasurably greater than that of any other known force.

Could it be harnessed and measured in terms of horse power, an ounce of radium contains in itself sufficient energy to lift 5,000,000 tons a distance of 30 feet or to hoist completely out of the water 100 of the world's largest battleships.

For Cancer Treatment  
It has been brought to Winnipeg for use in the treatment of certain malignant diseases, particularly cancer.

In the past it has been necessary for persons in need of radium treatment to travel long distances, adding greatly to the expense and cutting off the most efficacious treatment known to all excepting those of considerable means.

One of the features of the Radium Holding company, as its name implies, is that it is designed primarily to being the precious substance to Winnipeg, making possible the treatment of disease by radium for people of the west at a minimum of expense.

FINE SHOWING  
AT FISH CREEKOre at Mine Close to Premier  
Gives Promise of Being  
Shipper.

Great interest has been aroused in the camp, by the recent uncovering of a phenomenal ore shoot on the Fish Creek Mining Company's property near the head of Skookum creek, which is the north fork of Fish Creek, says the Hyder Alaska Miner. Numbers have gone up to look at the new find and the old timers who have been in the camp since it first attracted the attention of prospectors agree that the Premier never had anywhere near as good a surface showing. This, in view of the fact the Premier is today the largest producer of both gold and silver of any mine in Canada, compels the most conservative to admit that the Fish Creek group will be the next big producer, and it is within the bounds of reason to believe that the American mine will be a worthy rival of its Canadian neighbor, which is across the line almost within rifle shot.

High Grade and Milling.  
The Fish Creek Company have been working in a small way for years on a series of veins which are cut by Skookum creek at an average elevation of 1600 feet and upon which seven tunnels, totaling more than 1000 feet in length and exposing various shoots of both high grade and milling ore have been run. A comfortable camp was established here on a slight break in the extremely steep hillside, and operations were resumed here this summer upon the entry on to the property of Harry Tanner as superintendent. Work is being done in one of the tunnels, drifting in on a promising shoot of ore which is widening out and from which a considerable tonnage of shipping ore is being sacked, 280 sacks averaging 125 pounds in weight having been taken down the hill or stored at the mouth of the tunnel up to last Friday when the writer visited the camp. The second grade ore here is being saved for mill feed when a concentrator is constructed, being shot down a raise into another tunnel which is not now being worked. A trial shipment of five tons made several years ago from another tunnel gave returns of \$520 per ton, with silver at 50c per ounce.

Built Trail.  
But it was a strong outcropping 1000 feet higher than the old workings which proved the greatest attraction to the superintendent. He established a tent camp there and put a couple of men running open cuts and stripping off the overburden from the lead across the rounded summit of the hill. Early results were so encouraging that a substantial trail was built to the upper showing from the camp below, accommodation for more men were provided, and before fall substantial log buildings will be erected, as it is the intention to work there all winter.

The open cutting and stripping showed a continuous ore shoot for a distance of 600 feet with a width of from one foot to over three feet of ore, all of which will assay around the \$400 mark. The lead in one place is 12 feet wide, and here and there is a second shoot of high grade about a foot wide, on the hanging wall. The lead in which these shoots occur has been traced for a distance of about 2000 feet, starting from Skookum creek, crossing up and over the hill and down again toward the Salmon river. If extended to the road it would cross at about seven-mile. It is a contact vein, with granite on the footwall, and quartz-porphry on the hanging, the strike being almost east and west, and the dip to the north.

His Trade Secret.  
The court (during bankruptcy proceedings)—Kindly inform the court how you managed to keep your credit open.  
Defendant—Certainly. But allow me to suggest that I impart this information behind closed doors. There are several of my competitors present and I have no desire to teach them the secret.
