Waltham Watchwords

Saving Daylight

A GOOD deal of daylight is lost because of people not being absolutely sure what the time is. If you want to keep an appointment at 8:45 it's mighty confusing when the kitchen-clock says 8:05, the living-room time-piece registers 8:32 and your watch declares it to be 8:14. If you get there too early you lose time. If you're late the other man blames you for losing his time. Uncertainty means loss of time all round. The best thing to do is to carry a Waltham. Because of its unfailing accuracy a Waltham Watch is one of the best devices in the world for saving daylight.

Waltham Watches in a great variety of styles for ladies and gentlemen always in stock. Prices from \$25.00 upward.
