FORMER RESIDENT QUEEN CHARLOTTE'S A NEW INVENTION

The current number of the British Columbia Lumber Journal tells about an invention by Capt. W. L. Barton, who formerly operated a small mill at Port Clements, Queen Charlotte Islands, cutting the first bit of aeroplane spruce in British Columbia and later enlisting in the forestry corps in France.

The invention is of a high line locking carriage and operating drums. It is said to be almost foolproof and more rapid and economical than the present system.

The engineer—who requires only a fraction of the power now in use—tightens and raises his high line, locks it in place and "balances" two lines operating the carriage by the use of only two levers, and controls the locking device of the car running on the high line by touching only one of the levers. The locking is effected by the application of an entirely new principle, so simple that spectators are amazed that it has escaped the attention of experts.

At cards the first prize winners were Mrs. A. Astori and Mr. Hogan, the consolation awards going to Miss G. Orchard and Mr. Long. A delightful dance followed, music being provided by Charles Balagno, Harry Reid, Kenny Rood and William Balagno. Refreshments were served.

SPECULATION or INVESTING

Which do you follow? In mining, oil and new industrial stocks the profits are big on paper, but you seldom get them, and generally lose your capital, with nothing to show but a nice certificate with a large seal. Your best investment is in good Government and Municipal Bonds; the return may be low, but it is sure. Your best buy today is Victory Bonds to net 6%. We also have four £100 5% bonds at \$373, par value \$486. As British exchange advances you reap the benefit. About the first we recommended C. P. R. at \$113; today it is \$128.75.
