PREPARING FOR BIG SEASON IN AIR ON DOVER-PARIS ROUTE

LONDON, Mar. 23.—French air experts now declare their belief that this season the air-passenger traffic to the Continent will be more than doubled—that the 5,000 travellers who flew last season will increase this summer to as many as 20,000.

France is determined to carry the bulk of this valuable traffic. Last year she spent £125,000 on her subsidy. This year she is said to be prepared to devote £500,000 to it. By cutting the Paris-London air-fare to 300¢, about £5, 5s, at the present rate of exchange—airplane experts in Paris hope to divert from railway to airway a large number of first-class passengers. If, in fact, one takes into account the incidental expenses of a long boat and train journey, which are avoided in the air, it will now be almost as cheap to fly as to go by land and sea, with the added advantage, for the airway, that it saves about six hours.

Reduce Fare

Our air transport industry has been hit so heavily by the recent "slump" that, if an attempt is made to vie with the French in fare-cutting, it is feared that it will be impossible to make things pay. It will mean bringing our London-Paris fare down from £10, 10s, to £5, 5s, and even when our subsidy is added this will bring in only £6, 11s, 3d, per passenger. With the programme for 1921 so disorganized, and with orders cancelled for new and improved passenger craft, it is not thought possible for us to deal with a large enough volume of traffic to make profits at such low rates. With their plans laid last

Had an Annoying Hacking Cough Got No Rest at Night

Hacking coughs are very wearing on the system. The constant coughing disturbs the rest, and keeps the lungs and bronchial tubes in such an irritated and inflamed condition, that unless you get immediate relief the cough may become settled and serious lung trouble ensue.

There is no better remedy than Dr. Wood's Norway Pine Syrup for relieving all kinds of coughs or colds, combining as it does the long healing virtues of the pine tree with which it combined wild cherry bark, and the soothing and heating expectorant properties of other excellent herbs and barks.

"Mrs. E. J. Ross, Fenfold, Alta, writes:—About three years ago I caught a very bad cold, accompanied with a sore throat and hoarseness. I was so hoarse you could not hear me speak. I could get no rest at night with the terrible annoying, hacking cough. I tried several remedies, but they did me no good. I finally saw Dr. Wood's Norway Pine Syrup advertised so I got a bottle. It at once gave me relief, and after using four of them my cough had all gone. Now I always keep it in the house."

"Dr. Wood's" is put up in a yellow wrapper, three pine trees the trade mark, price one and one, a bottle. Manufactured only by The T. Minnion Co., Toronto, Ont.

autumn, and steadily adhered to, it will be the French and the Dutch—the latter dominating the routes to northern Europe—who will reap most benefit from this coming air "boom."
