LARGE CATCH OF HERRING IS BEING FROZEN HERE FOR HALIBUT BAIT

Thousand Tons of Herring are Frozen for Halibut Bait

Over a thousand tons of herring have been frozen this year by the Canadian Fish and Cold Storage Co. and there is two weeks more of herring fishing, according to the general opinion of those engaged in the business. This herring is to be used as bait in the halibut fishing.

Asked this morning in regard to the business, Manager T. H. Johnson said that they were putting up a large quantity of bait for the season and it was the finest quality they had ever taken. It was in the freezer only six hours old.

The boats engaged in the business are the Fredelia, which is doing the seining, and the Starrett and the Legaic which tows the seine. They have had a very successful season. The herring are being frozen in regularity and are being cared for at the cold storage immediately on their arrival.

BREWERS GET TOGETHER IN ASKING BEER

Drinking Places Where It Can Be Obtained Without Delay.

OTTAWA, March 12.—The resolution of the new liquor act being introduced by the legislature and passed has caused the brewers to gather and renew the old free selling of beer, and urged that the government should drinking places, where beer can be obtained without delay.

ELY MOVE IN FORTNIGHT

Pacific and Booth Fisheries Moving Ready to Move to Government Dock.

Two weeks' time the Booth Fisheries Canadian Co., Allyn and Pacific Fisheries, will be established in their quarters at the government dock. The Allyn is nearly finished and the installing of its equipment and improvements at the location and the Pacific and Booth Fisheries are well advanced with the present packing houses at the end of the Grand Trunk Pacific docks will be moved but it has not yet been decided what will be made of the buildings that will have to be replaced as progress advances on Allyn wharf.

Accommodation for a fish export at the government dock is found in one of the offices of the government dock. The move is made the halibut industry will be pretty centralized at the government dock. All the buyers except the Canadian Fish and Cold Storage and the Pacific Sea Products are being established with headquarters offices there.

A. Fasson, of the local office of the Royal Bank, left last for Alice Arm where he will be in the branch at that point for a few weeks.

Telegraph wires have been a good deal today, the being caused by slides in the interior.

STRONG DEMAND FOR B. C. LUMBER IN THE ORIENT

VANCOUVER, March 10.—There is a strong demand for B. C. lumber in the Orient. It is reported here by the local lumbermen. The Canadian Robert Dollar Company is shipping a large quantity. The demand is caused by the fall in freight rates from a minimum of 825 to 812.50.

The resumption of cutting by the mills is general and logging camps are opening.

GOVERNMENT ASKED ASSUME CONTROL OF LIQUOR DISTRIBUTION

Effort Being Made to Break up Bone Dry Combination in Ontario.

LONDON, Ont., March 10.—A number of petitions are being circulated in this city asking the Ontario Government to assume control of liquor distribution, as a substitute for the proposed "bone dry" law. Local temperance workers declare the petitions are a scheme of the liquor interests to "draw a herring over the trail." As a result of the decision of the Government to permit appeals in liquor cases, it is stated here that there will be many appeals from people in this district who have been subjected to heavy fines for breach of the O. T. A. during the past few months.

LURE OF GOLD ON QUEEN CHARLOTTE

An unauthenticated report comes from Skidegate that a Mr. Pettipiece of Massett had brought in all the gold he could carry from Naden Harbor. The south-east storms have prevented a stampede to the fields but rumor has it that a company has been formed in the Old Town composed of Messrs. Deasy, Ponder, Gillette, Baker, Mancore and Pettipiece, to corral the new Eldorado.

Tongues are wagging busily at all points but there is a note of indefiniteness in connection with the reported find. No one has seen the gold.

THEY BANK MONEY ON FORTY CENTS A DAY.

Moy Ling, Kng Mai and Yim Mai showing an interested onlooker how to judge raw silk. They can live on forty cents a day when they are at home. They came to New York to participate in the international silk show and are the first Chinese women who ever set foot out of China on such a mission. In Southern China beginners are paid thirty cents a day, rising as they receive the magnificent sum of forty cents and even sixty cents at times, and are putting money by for hard times.

MIXED MARRIAGES ARE OBJECTED TO BY ARCHBISHOP McNEILL

Says People Lack Social Sense and Forget Effect on Public

"Most of the social problems which vex the minds of reformers are connected with family life," states Archbishop McNeill in a Lenten pastoral. "Directly opposed to unity of the Christian family is the legal system of divorce."

"Another obstacle to family unity is the mixed marriage, that is, the marriage of a Catholic with a non-Catholic. The first thing that strikes one in dealing with marriage engagements of this kind is the tendency of the parties to regard the matter as one of individual or personal concern merely. They agree that the proposed marriage promises to make them happy; then why should others care? They seem often to lack any social sense, and to be unable to understand that every marriage affects the general public in one way or another."

Ontario Schools

"In Toronto the effect of mixed marriages upon the Catholic body is brought home to us by the fact that the other Catholics pay about thirty thousand dollars every year to educate the children of mixed marriages. The law, as interpreted in Ontario, forbids a non-Catholic to pay his school taxes to a Separate school board, even when he sends his children to a Separate school. The existence of Separate schools is threatened by the multiplication of mixed marriages and by the lack of thought for the welfare of the church on the part of too many young people."

Three Influences.

His grace states that family unity has been weakened by three other influences which should also be considered. "One is the industrial revolution which began in the 18th century; the second is the performing of family functions by the community or by the state; and the third is commercialized pleasure for children."

COLD STORAGE FISHING BOATS WILL OPERATE AS INDEPENDENTS THIS YEAR

The Canadian Fish & Cold Storage Company is sending out its boats to fish on the independent lay instead of as company boats. The Chief Skugaid, a six-dory boat, leaves tonight for the halibut banks in charge of Captain Lawler, this being the first of the company's boats that has ever fished as an independent. It means that the owners will get one fifth of the proceeds of the catch, out of which they pay a bonus to the captain, and keep up and insure the boat. The captain and other fishermen share the other four-fifths equally after paying operating expenses.

The company is planning to send also the Sitka and the Zebassa, both six dory boats, on a similar plan, and if a suitable skipper can be secured the Summer may also go out. Owing to the excessive cost of operating under the company lay, the big steamers will tie up indefinitely. No attempt will probably be made to operate them as independents.

Mr. Johnson, manager of the company, explains that the cost of operating the boats is too great under the company lay and there is nothing to do but tie up the larger ones and operate the smaller craft as independents.

JAMES RAMSAY
Member of the Legislature for Vancouver city.

IS PRVIRIE LIQUOR BEING SENT TO B.C.

Stuff Manufactured in Saskatchewan for Export Said to Contain Wood Alcohol.

SASKATOON, Sask., March 10.—To give it "a kick" and the "correct color" wood alcohol and aniline dyes are being freely used for doctoring and diluting liquor landed by some of the export liquor houses in the province, according to R. E. Leech, chairman of the Saskatchewan Liquor Commission.

"Some of the product is little less than rank poison," said Mr. Leech. "The wood alcohol is used to give the drink a 'kick' and aniline dyes are used to give the dope the requisite color. The dyes can be skilfully shaded to represent Scotch whiskey, Irish whiskey or almost any other brand of spirit. In addition to these ingredients, instead of distilled water being used for the mixtures, anything that has a semblance of water, whether it be from the pump, a river, or a slough serves the purpose."

AGE FOR MARRIAGE.

CALGARY, Alta., March 10.—The adoption of a uniform marriage law throughout Canada is urged by the Local Council of Women, who have discussed the subject at recent meetings. They advocate raising the legal age for marriage from 18 to 21 years.

MEMBERS OF PARLIAMENT AROUSED OVER RAILWAYS VERY SERIOUS SITUATION

OTTAWA, March 10.—An insistent demand both among Government and opposition members is developing for the curtailment of railway estimates and the reorganization of the whole Canadian National Railways system. The huge estimate brought out in the budget has brought about a realization of the seriousness of the matter.

The warning of Hon. J. D. Reid, minister of railways, may lead to a general investigation of the whole situation. The estimates for railways will have a stormy passage.

SAANICH TEACHERS ON STRIKE TODAY

SAANICH, March 10.—Fifty-four teachers in the schools of Saanich municipality are on strike today as a result of the refusal of the school board to meet wage demands. The teachers offered to negotiate or arbitrate their requests but this the board declined to do. Accordingly the schools are closed today.

W. R. LORD GONE TO SEARCH FOR MISSING BOAT

Noted With Four Fishermen is Thirty-four Days out on West Coast.

The W. R. Lord, loaned for the purpose by the Canadian Fish and Cold Storage Co., left last night to search for the fishing boat Notlad which is 34 days out and fears for the safety of which are being expressed on the waterfront. Capt. Parsons was in charge of the Lord with the engineer and a volunteer crew of five fishermen.

The Notlad was spoken on February 20 at Marble Island on the farther end of Skidegate Channel. She is a Prince Rupert craft in charge of Captain Jack Smith and with him Harry Haskell, Charlie Cook and William Pearl, all fishermen.

The Government boat Newington would have been loaned by Capt. Saunders for the search, but she is at present at Green Island and the delay in getting her away would be very considerable.

FIRST MATE IS BLAMED

Princess Beatrice Was off Course When Struck Bluff on Lasqueti Island.

VANCOUVER, March 10.—As a result of the stranding of the Princess Beatrice a month ago today at Tucker Bay, Lasqueti Island, Straits of Georgia, First Mate F. R. Springalls has had his certificate suspended for three months. The vessel was found to have struck a bluff when off her course. All passengers were removed in safety. Captain William Boyce and the other navigation officers of the vessel are found free of blame.

FOUR BOATS BEING REPAIRED AT SEAL- COVE MARINE WAYS

The Seal Cove Marine Ways are working this week on four gasoline boats.

The Teton, which was wrecked on Frederick Island some months ago, is just finished and off the ways and will be ready to fish again next week. Her job was quite extensive.

The Ingrid H., which went aground on Herbert Reef about a fortnight ago, is also finished and leaves tomorrow night again.

The fishing boat, Speculator, and Harry Mobley's pleasure boat, Seminole, are up for general overhaul. The latter was rather badly burned in the interior last winter when a gasoline stove exploded while the boat was on a hunting expedition.

BIRTH.

There was born last night at the General Hospital to Mr. and Mrs. Frederick Barber, Pacific Rooms, a son.

Capt. Nicholson, head of the Canadian National steamships on this coast, is leaving tonight for Vancouver.

MAKING GOOD TIME ON DOCK

Pile Driving is One Third Done and Decking Commenced

The work of construction on the new 800 foot salmon wharf at the west end of the present Grand Trunk Pacific Dock is advancing very rapidly. One third of the pile driving is done and a start has been made on the decking. Although progress depends largely on the condition of the weather and other circumstances it is likely that the pile driving will be completed some time next month.

The pile driving follows up on the work of bringing sand across from McNeill for the foundation and the casting up by another dredge at the side of the wharf. The tug Fearful, which was engaged in the work of bringing sand across the harbor until her recent mishap, has gone to Vancouver and may not return here, but the McCulloch is carrying on her work.

FISH ARRIVALS

About two carloads of halibut is in at the local fish wharves and was sold this afternoon, the average price paid being 15.10 and 6.30. There are plenty of fish cars in to handle it.

Following are the boats: Livinstone, 20,000 pounds; Cedric, 9,000 pounds; Kayousu, 5,000 pounds; Pair of Jacks, 9,000 pounds; Cora, 3,500 pounds, and Ruth, 5,000 pounds.
