## POLICE COURT ROBBERY CASE

Fred Auriel and Ernest H. Pearce Charged With Taking Clothes.

Fred Auriel and Ernest H. Pearce appeared in the police court this morning charged with theft and were remanded until next Monday after the evidence had been all taken. The witnesses were Alfred and Peter Brown, whom it is alleged, were robbed. Lee Wong, waiter in the Dominion Cafe where the Browns resided, and Sergeant Adams, who made the arrest.

In giving evidence Sergeant Adams told that at 5:30 yesterday afternoon Alfred Adams had come into the police station complaining of having lost a grip and clothes. He told that an Indian name Auriel had taken them and was about to leave on the Princess Mary.

WENT TO BOAT.  
Together with Alfred Brown the officer went to the wharf where the Princess Mary was lying and there they met Auriel. Asked if he knew anything about the grip, Auriel denied any knowledge of it. On being asked where he was sleeping, the officer was taken to the second class cabin. No grip could be located except one which Pearce had. Both Pearce and Auriel were then taken to the station.

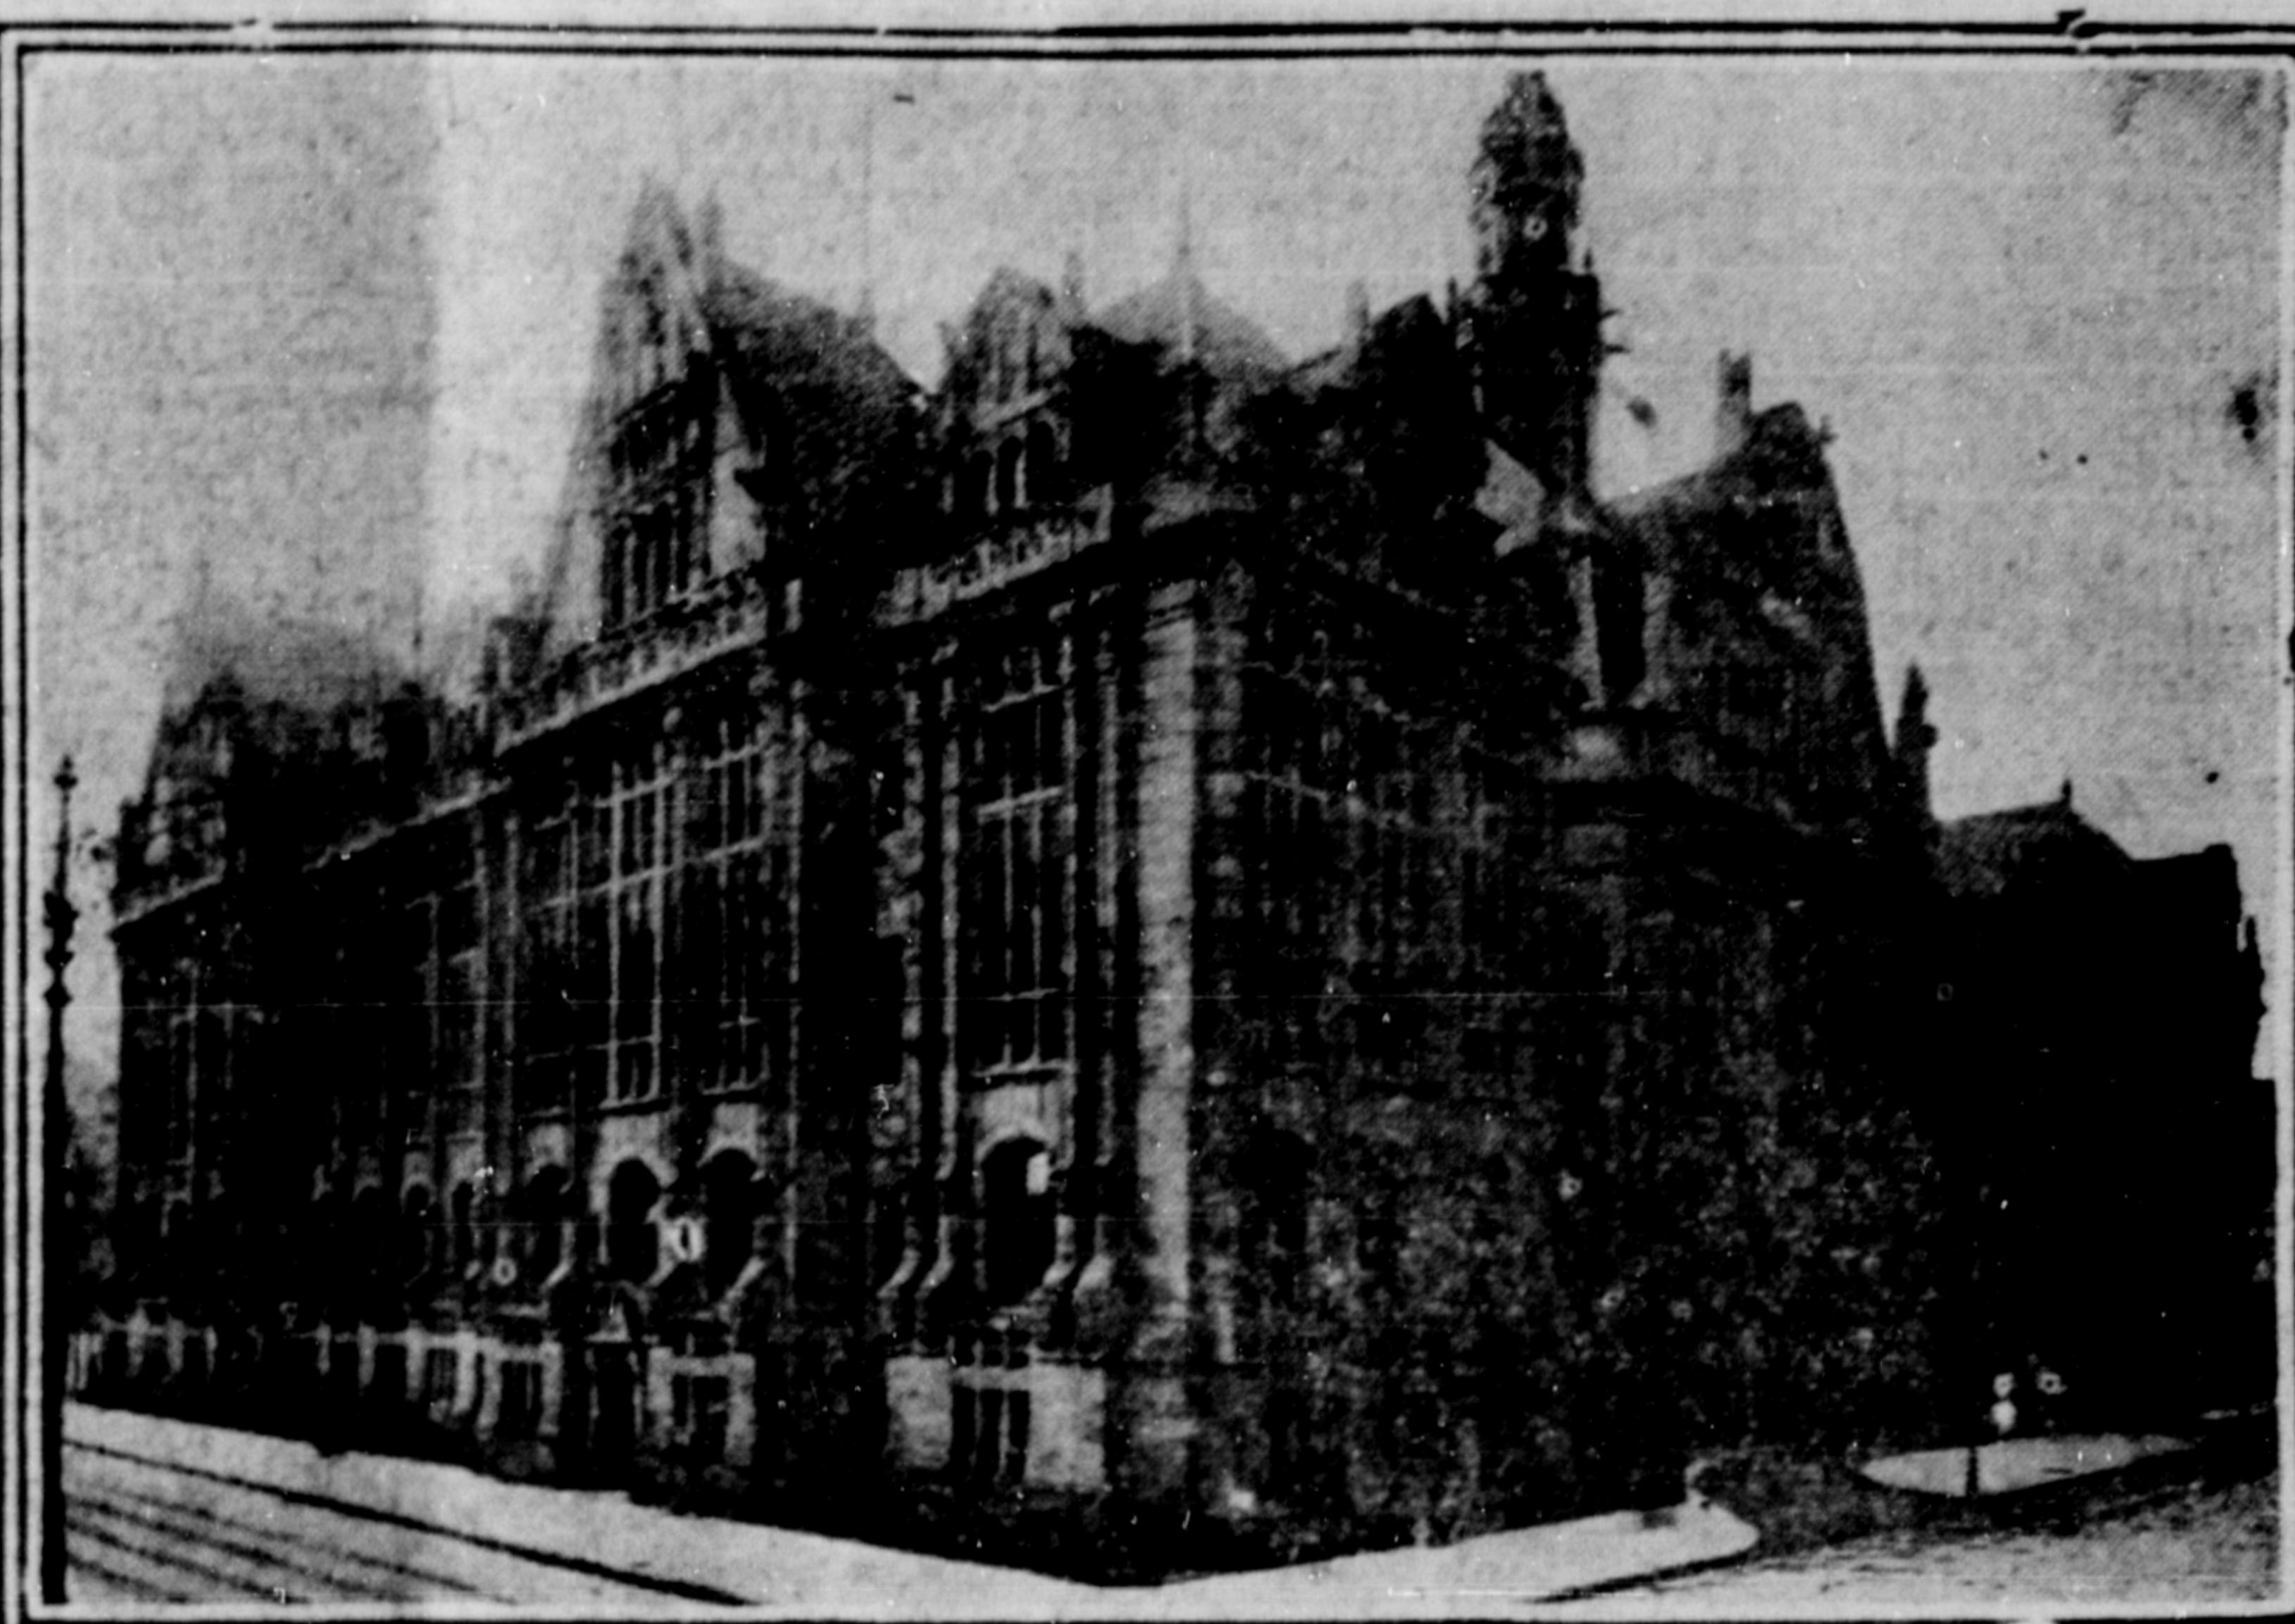

Returning to the vessel the officer asked the captain to hold the boat till a further search could be made for the suitcase. It was found underneath one of the bunks and as soon as Brown saw it he identified it as his own.

IDENTIFIED GOODS.  
Coming back to the station with Alfred and Peter Brown the grip was opened in the presence of Constable Leek. Alfred Brown identified it as his property two flashlights, a pair of boots, one blue suit, one suitcase and shirts, collars and ties. Peter Brown identified a red sweater, one flash light, an overcoat and a suit. The exhibits were produced and marked in court.

Asked by W. E. Williams, counsel for the defence, if he could tell under whose bunk the suitcase was found, Sergeant Adams replied that he was unable to.

THE STATE HOUSE IN DUESSELDORF, ENTERED BY FRENCH.

For the failure to meet the Allied reparations demands, French troops have taken possession of the city of Düsseldorf. Essen, the home of the famous iron works, where all the large guns and most of the munitions were manufactured by the Germans in the great world war, may also be entered by the Allies. The city is situated a short distance away from Düsseldorf. The picture shows the State House in Düsseldorf.

## SIX CARLOADS OF FISH GO EAST

NINE MORE CARS REPORTED FOR ARRIVAL TONIGHT—30,000 POUNDS WAITING.

The six carloads of halibut bought up at yesterday's fish exchange for eastern shipment were dispatched by special train this morning for Chicago where they will be distributed to the different cities of the middle states and the Atlantic. ## WATER CRAFT WHICH ALSO FLIES LATEST THING IN AVIATION

LONDON, March 29.—Experiments are being carried out here with an absolutely new type of air and water craft. The first of these has been built by the Fairley Aviation Company and is an absolute departure from anything ever before used. Two more are in course of construction.

The chief point about these craft is that they will be capable of maintaining themselves at sea without the need of a parent ship. They will be, in fact, small ships that can also fly, which is a very different thing from an aeroplane that can at need ride on the water. When not in the air the craft will be able to taxi along the water, driven by their propellers, for long distances. They will operate from a sea base like the submarines, and, with a range of about 1,500 miles, are designed to be able to live an independent existence at sea for fairly long periods. The weight is about 15 tons and the span of the wings 140 feet. The cruising speed is 110 miles an hour. They are provided with a hull of great strength and resistance, and it is claimed that they will be able to ride out rough seas like any other ship. There are four Rolls-Royce engines giving a total horsepower of 2,400. A crew of about seven will be carried. The flying boats will go out with the fleet and remain out on manoeuvres, and when not scouting in the air will keep with the big ships like the destroyers.

If all that is claimed for them proves to be sound it is expected that these boats will become the standard type for patrol work with the fleet. They are, of course, very much cheaper than airships, which are now apparently obsolete for this purpose, and they will also make obsolete the carrying of seaplanes on specially constructed mother ships.

HAD SMALLPOX  
WERE STARVING  
NORTH ALASKA

VANCOUVER, March 28.—The Ottawa Senators were victorious over the Vancouver Millionaires in the third game of the Stanley Cup hockey series played here last night. The match was another evenly contested one, the score being three to two.

This is the third match in the series to decide the professional championship of the world. Vancouver won the first and Ottawa the second. Three wins out of five is decisive.

VANCOUVER, March 29.—Word received here tells of serious injuries to J. Eckert, engineer on the gasoline fishing boat Inskip of Smith Inlet, Queen Charlotte Sound. Eckert was taken to hospital at Alert Bay. The Inskip is being towed to port.

The boat is the property of Canadian Fish Co. Ltd., of Vancouver, and is 52 feet long 14-ft. beam.

## RELIEF WORK STOPS SOON

GOVERNMENT WITHDRAWS ITS GRANTS AT END OF MONTH—NEED DIMINISHING

The government will withdraw its allowance for relief work in the municipality on March 31 and the work will then automatically cease. Fortunately the need is becoming less at the present time and the numbers of those applying at the city engineer's office for the past few weeks has been steadily decreasing.

So far this week but 55 have made application and these have been granted the relief work. For the week ending May 5 there were 162 applications, March 19, 112 applications, March 26, 71 applications and the record this Saturday, it is likely, will be smaller still. With the starting of various industries and building at the first of April there will be little need for the work at all, it is anticipated.
